WOODLAWN NURSERIES ROCHESTER, N.Y.

A FIVE YEAR OLD
ORCHARD OF WOOD'S
EARLY CRAWFORD
PEACH TREES

WOOD'S EARLY CRAWFORD PEACHES

EACH TREE YIELDED
FROM FIVE TO
SIX BUSHELS

*Allen L. Wood
Proprietor*

*Established
1876 - 38 Years*

1914

ELBERTA PEACH ORCHARD THREE YEARS OLD
EACH TREE YIELDED OVER ONE BUSHEL

“Wood Quality”

IN TREES MEANS—
good fibrous roots, well
shaped heads, clean limbs
and Trees true to name.

“WOOD QUALITY”

IN PACKING INSURES
your order getting to you
in the best of condition.
Small orders are carefully
tied up, the tops in flag to
keep the tree from bruises
and the roots in damp
moss wrapped over with
burlap to retain the
moisture.

Large orders are packed in paper lined boxes. We use wet moss for the roots, straw for the tops. The paper lining keeps the air and frost out and the moisture in.

This Book is Our Salesman

WE don't have to pay this "salesman" of ours a large commission on everything he sells and we don't have to pay his expenses. We save you this commission and expense money. Our customers pay for what they buy and we don't have to add to the price of each tree and make you pay for others bad debts. We grow our own trees and sell them direct from our nurseries to you and, as we have no tree agents, we do not have this expense of salaries; therefore, we can save you from 30 to 50% on your order. Our guarantee and our square dealing business records are well known all over the country. Here is what the Government Department of Agriculture says in the Farmer's Bulletin, No. 113, about buying trees and plants: "If the farmer makes his purchase direct from the nurseryman, he will save the expense of the middleman or agent, and is less liable to the mistakes and injuries that may occur through repeated handling."

Deal Direct with the Grower

It's the sure way to get your stock true to name and the only way to save money when buying trees and plants.

NO. 18

State of New York

Department of Agriculture

CERTIFICATE OF INSPECTION OF NURSERY STOCK

This is to Certify that the stock in the nursery of ALLEN L. WOOD, of Rochester, County of Monroe, State of New York, was duly examined in compliance with the provisions of Section 305 of the Agricultural Law and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose Scale or other dangerously injurious insect, pest or pests.

CALVIN J. HUSON,
Commissioner of Agriculture.

Certificate expires Sept. 1, 1914.
Dated at Albany, N. Y., Sept. 4, 1913.

"Wood Quality" Trees are known by all large Fruit Growers

“Wood Quality” Trees

Will Bear Early—See page 9

Compare our prices with those of any other reliable nursery. We do not sell cheap stock but good stock for less money.

Order Sheet is directly opposite this page—READ CAREFULLY

How to Order—Make out your order on blank on opposite page. Give full name and shipping directions. If directions are omitted we use our own judgment in shipping. Small orders go cheaper by express, large ones by freight. **Send payment with order**—procure a money order at your post office, draft from the nearest bank or send cash in REGISTERED LETTER.

Order Early—Our orders are shipped in rotation — order early and you get your stock early. If you want your order shipped on a certain date, mark so plainly on your order.

Packing—We make no charge for boxing or packing—our goods are delivered FREE ON BOARD CARS HERE.

We Grow Our Stock and Can Guarantee It—Our trees are first-class in every respect. WE GUARANTEE our trees, plants and other stock shall reach our customers safely and in GOOD CONDITION. Our stock is grown near Rochester, a section of the country which is widely famed for producing the finest trees. We have never had San Jose Scale or any other tree disease in our nurseries. Stock is inspected regularly by State Experts who issue a certificate of inspection, declaring trees free from all disease. We send you a copy of certificate with every order.

For Thirty-eight Years we have strived toward building up a direct trade between grower and planter by straightforward, honest dealings, and we are making friends and permanent customers by our methods.

Our Responsibility—Inquire of any Commercial Agency, any bank or large business house in Rochester. Our best advertisements are our pleased customers. IF WE PLEASE YOU, TELL YOUR FRIENDS, WE WILL PLEASE THEM ALSO. While we take the greatest pains to have our stock genuine and reliable, we agree to replace, on proper proof all that may be untrue to name as labeled, at the rate of 2 to 1, and it is hereby mutually agreed that our replacing it, or offer to replace, shall operate as a liquidation of all damages.

Collections—This year we are making a great reduction on trees and plants when purchased as collections. There are many of these to pick from and they offer customers many opportunities to save money. We can make no changes in collections, as these are sorted and bundled where the trees are dug and sent to our packing cellar, saving us time and making it possible for us to offer them at a reduced rate.

On page 11 you will find a list of premiums that we are offering on orders of different sizes.

We want your order and if given a chance will prove we value it. (over)

WOODLAWN NURSERIES

[illegible]

Please write below names and addresses of a few of your friends who are interested in and buyers of Trees, Shrubs, Roses, etc.

DID YOU SEE OUR OFFERS FOR \$5.00 AND \$10.00 ORDERS?

ALLEN L. WOOD, Rochester, N. Y.

WE GIVE AWAY 10,000 TREES

These are new varieties for you to test. See page 11

WOODLAWN GOLDEN PEACH

A new variety that we are growing. It is larger than the Crawford's Early, and its flavor is fully as good. See description on page 36.

WOODLAWN GOLDEN PIPPIN APPLE

It is a golden yellow with a pink cheek and the flesh is firm, crisp and juicy. See description on page 15.

Tree agents will tell you that our prices are so low that we cannot sell you good trees. Look over our record for the last thirty-eight years. By growing our own trees and plants and dealing direct with you, saving this agents expenses and commissions, we have established an envied name as the growers of fine reliable stock.

WOODLAWN NURSERIES—*"Wood Quality" Stock.*

Good, straight, well-rooted Trees, true to name—"Wood Quality"

Woodlawn Bargain Collections

These collections are made up entirely of our best grade of stock and are especially adapted to the home garden. We have taken the best varieties and can guarantee all of them as good eating and canning kinds. We make no changes in collections as they are sorted and bundled on our growing grounds.

No. 1 HOME GARDEN COLLECTION

1 Jonathan Apple	1 Elberta Peach	1 Duchess Pear	1 Lombard Plum
1 Greening "	1 Crawford "	1 Sheldon "	1 Wickson "
1 Red Canning Cherry		1 Yellow Eating Cherry	

This is a special bargain we offer our customers each season. 10 trees, good quality, fine roots and tops. All good varieties. Our Special Price, **\$2.00**

No. 2 BARGAIN APPLE COLLECTION

1 Gano	1 Greening	1 Snow	6 Two-year-old Trees for \$1.76
1 Stark	1 Jonathan	1 Banana	

A collection that cannot be equalled for varieties or for grade and class in trees. An old standby of ours that we have been selling our customers for years.

No. 3 BERRY AND CURRANT COLLECTION

3 Red Raspberry	3 Red Currant	1 White Grape Vine	\$1.98
3 Black Raspberry	3 Gooseberry	1 Red Grape Vine	
3 Blackberry	ALL GOOD PLANTS	1 Black Grape Vine	

No. 4 SPECIAL PEACH COLLECTION

2 Elberta	2 Niagara	1 Alpha	9 Fine Peach Trees — Good	\$1.67
2 Crawford	2 Carman		Roots and Tops—9 Trees	

No. 5 PLUM COLLECTION

1 Bradshaw	1 Geuii	1 Shipper's Pride	\$1.83
1 Lombard	1 Yellow Egg	1 Monarch	

AND ONE WOOD'S IMPROVED GERMAN PRUNE

No. 6 WORLD'S CHERRY COLLECTION

Same old reliable list of sweets and sour cherries that we have been selling our customers for years

1 Black Tartarian (sweet)	1 Gov. Wood (white sweet)
1 Montmorency (red sour)	1 Windsor (red sweet)
1 Dyehouse (red sour)	1 English Morello (red sour)

6 first-class trees, all good varieties. This collection cannot be beaten as a bargain. Our price this season \$2.16. With the first 1000 of collections sold we will include 1 BENDER SOUR CHERRY TREE FREE OF CHARGE. **\$2.16**

No. 7 STANDARD PEAR COLLECTION

1 Anjou	1 Lawrence	1 Wilder Early	6 Two-year-old Trees \$1.43
1 Sheldon	1 Flemish Beauty	1 Clapps Favorite	

No. 8 WOOD'S CHERRY COLLECTION

Eight two-year-old well rooted Trees, X Grade

2 Montmorency (sour red canner)	2 Black Tartarian (sweet black eater)	8 Trees for \$1.63
2 Napoleon (sweet yellow eater)	2 Ea. Richmond (sour red canner)	

Express and Freight Rates

from our Nursery to various Cities and Towns in the U. S. If you do not happen to live in one of these places mentioned, you can readily figure out what the rate to your place would be by comparison with a place of about equal distance, that is on this list.

Any portion of 100 lbs. at above express rates, but no package forwarded for less than 35c.

ESTIMATE WEIGHT OF TREES AND PLANTS BOXED

Trees, XXX, 6 to 7 feet, 200 to 250 lbs. per 100 trees

Trees, XX, 5 to 6 feet, 150 to 200 lbs. per 100 trees

Trees, X, 4 to 5 feet, 100 to 150 lbs. per 100 trees

Shrubs, Roses, etc., No. 1 size, 75 to 100 lbs. per 100 plants

Grapes, Berries, etc., No. 1 size, 25 to 50 lbs. per 100 plants

It is impossible to give a more definite estimate as some varieties weigh more than others, on account of the difference in the density of the wood growth. For instance, a Peach tree would weigh less than a Pear tree of exactly the same size. The above however, will enable you to make a close estimate as to the freight rate on a given amount of stock.

The Railroads bill all small shipments as weighing 100 lbs. each, even though the actual weight be less.

PLANTING DIRECTIONS

The Preparation of the Soil—For fruit trees the soil should be dry, either natural or made so by thorough drainage, as they will not live or thrive on a soil constantly saturated with stagnant moisture. It should also be well prepared by twice plowing, at least, beforehand, using the subsoil plow after the common one at the second plowing. On new, fresh lands, manuring will be unnecessary; but on lands exhausted by cropping, fertilizers must be applied, either by turning in heavy crops of clover, or well decomposed manure or compost. To ensure good growth of fruit trees, land should be in as good condition as for a crop of wheat, corn or potatoes.

Preparation of Trees or Other Stock—We use great care in digging and packing, but the loss of some small roots and fibers is unavoidable. If stock is properly prepared before it is planted, no permanent injury will result from this, but the preservation of the natural balance between top and roots renders *a vigorous cutting back of the former is absolutely necessary* in some cases. And, therefore prune off broken ends of roots, if any (a smooth cut root granulates or make ready to extend sooner than one broken off), cut back the tops to within three or four buds of the base of the limb, taking care at all times to prune in such a manner as will tend to develop a well-formed head, sufficiently open to admit air and light freely. Evergreen and other ornamental trees, the beauty of which depends on preserving their natural form, should be pruned very little. Hence, great care should be taken in planting and caring for these. If not ready to plant when the stock arrives, "heel it in" by placing the roots in a trench and cover them with mellow earth, *well packed*.

Planting—Make the holes large enough to admit the roots without any cramping or bending, and deep enough to bring the tree to its natural depth. The fine surface soil should be used in covering the roots, and this should be carefully worked among them. If the ground is dry it is well to pour in some water when the hole is partially filled. *See that the ground is firmly and solidly packed over all parts of the roots by exerting the full weight of the planter upon it*, so that there will be no opportunity for dry air or frost to enter and destroy roots deprived of the full benefit of their natural protection. Omission to pack the earth solidly is a most frequent cause of failure in planting nursery stock. Fill the holes even enough to be even with the surrounding surface after the fresh earth settles. Always remove the label when planting. If this is left until the tree has grown, the connecting wire often cuts into and destroys the tree or branch to which it may be attached. *Never use wire in contact with roots*. When planting dwarf trees set them low enough to cover the stock upon which they are budded, but not lower. Large standard trees should be staked and tied so that the wind will not loosen the roots. This should be so done that the bands will not chafe the trees. It is a very good way to drive two stakes and confine the trees between straw or hay bands stretched from stake to stake. Do not put manure in contact with the roots for it burns them.

Mulching—When trees or bushes are planted, they should be mulched or covered with a layer of

coarse manure or litter three to six inches deep for a space of say, two feet more in diameter than the extent of the roots. This keeps the earth moist and even temperature.

After-Culture—Grass should not be allowed to grow about your trees or plants. The ground should be cultivated for a space of at least a foot outside the roots. If the ground is poor it should be enriched with surface applications of manure. Pruning should be varied according to the condition of the tree and the purpose of the planter. It should be done regularly each spring before the buds swell any. In this way the removal of large branches will be avoided.

Treatment of Trees that have been Frozen in the Packages or Received during Frosty Weather—Place the packages, unopened, in a cellar or some such place, cool, but free from frost, until perfectly thawed, when they can be unpacked, and either planted or placed in a trench until convenient to plant. Treated thus, they will not be injured by the freezing. Trees procured in the fall for spring planting, should be laid in trenches in a slanting position to avoid the winds; the situation should always be sheltered and the soil dry. A mulching on the roots, and a few evergreen boughs over the tops will afford good protection. If partially dried from long exposure, bury entirely in the ground or place in water from 12 to 24 hours.

Distance for Planting

Apples, Standard.....	30 to 40 ft.	Grapes.....	8	by 10	ft
Apples, Dwarf.....	8 to 10 ft.	Currants.....	3	by 5	ft
Pears, Standard.....	18 to 20 ft.	Gooseberries.....	3	by 5	ft
Pears, Dwarf.....	10 ft.	Raspberries, Red.....	3	by 6	ft
Peaches.....	16 to 18 ft.	Raspberries, Black.....	3	by 6	ft
Nectarines and Apri-		Blackberries.....	5	by 7	ft
cots.....	16 to 18 ft.	Strawberries, rows.....	1	by 4	ft
Cherries, Sweet.....	18 to 20 ft.	Strawberries in			
Cherries, Sour.....	15 to 18 ft.	beds.....	1½	by 1½	ft.
Plums.....	16 to 20 ft.	Asparagus, in beds.....	1	by 1½	ft.
Quinces.....	10 to 12 ft.	Asparagus, in field.....	1	by 3	ft.

Trees and Plants to the Acre

2 feet each way.....	10,890	15 feet each way.....	194
3 feet each way.....	4,840	18 feet each way.....	135
4 feet each way.....	2,723	20 feet each way.....	110
5 feet each way.....	1,742	25 feet each way.....	70
6 feet each way.....	1,210	30 feet each way.....	48
8 feet each way.....	630	33 feet each way.....	40
10 feet each way.....	430	40 feet each way.....	28
12 feet each way.....	302		

To estimate the number of plants required for an acre, at any given distance, multiply the distance between the rows by the distance between the plants, which will give the number of square feet allotted to each plant, and divide the number of square feet in an acre (43,560) by this number, the quotient will be the number of plants required.

A Book on Fruit Growing

Amateur Fruit Growing—This is a splendid guide for those who have not made a study of fruit growing and wish to follow a course of instruction that will insure successful results. This book deals with only the common practices and the simple methods of fruit culture. An excellent book for the amateur. Plain, straightforward fruit talk, 25c.

Trimming

It is surprising how many orchards you see planted out with the young trees left with the full amount of limbs on, just as they came from the nursery. By the accompanying drawing we endeavor to show how a young tree should be trimmed and planted:—One of the most necessary of all things is to make the hole large enough to hold the entire root system well spread out. Never crowd the roots. Plant the tree in the ground an inch deeper than it was in the nursery row. You can easily see the mark on the trunk.

Next is to trim the young tree the way you want it to grow. If a low headed tree is preferred, cut back the top leaving such limbs as you may want. In the drawing we have shown the most popular way of trimming young trees. This generally gives a medium height tree very well formed. The cross lines marked "A" on the limbs show where the cut should be made. The two lower limbs are too low to be left on and should be cut off close to the trunk as marked by the lines "A."

If more pains were taken in setting out your stock, there would be less loss of trees to the planter.

Details of Setting the Young Trees

The work of planting is made comparatively easy by the opening of a furrow with a plow for the rows and cross-checking to indicate the points at which to set the trees. When planting, cut back the top to a point where the future head is to be formed, smooth off the ends of all the bruised and broken roots, then set, at the point in the row indicated by the cross check, straighten the roots out into a natural position; fill in among them firmly, fine dirt, and tramp all down with the foot. It is best to set the trees a little deeper than when in the nursery and leaning slightly to the south or southwest, to brace them against prevailing winds. By this position the top will soon shade and protect the bodies from the intense heat of the summer sun, which is likely to cause sun scald. After the planting of the orchard is completed, the open furrows between the trees may be filled up by

plowing one or more furrows against the row. The second year the young shoots are usually cut back again.

Age that Apple Trees begin to Fruit

Our fruit trees when shipped from the nursery are 2 years old. Peach trees are always 1 year old. The following list is not complete but it gives an idea to planters what varieties to select that will come into bearing quickly.

Three Years

Grimes Golden	Maiden Blush
Duchess of Oldenburg	Wealthy
Yellow Transparent	Jonathan

Four Years

Sweet Bough	Stark
Gravenstein	Ben Davis
York Imperial	

Five Years

Early Harvest	Rome Beauty
Red Astrachan	Stayman Winesap
Fameuse or Snow	McIntosh
North Western Greening	Hubbardson Nonesuch
Sutton Beauty	

Seven Years

Wolf River	Wagener
King	Spitzenburg
Rhode Island Greening	Northern Spy
Baldwin	Talman Sweet
	Newtown Pippin

The Old Square Method

The New Triangular

There are two ways to set out an orchard. The old square way, where trees are planted on the four corners of a square, and the new way where trees are planted on the three corners of a equal-sided triangle. This new method is becoming more popular every year. It permits cultivation in three ways and gives you more trees to the acre.

	Old Method	New Method
Trees planted 30 ft. apart each way,	49 to acre	58 to acre
" " 24 ft. " " "	75 " "	90 " "
" " 20 ft. " " "	108 " "	128 " "

Fillers may be planted between the permanent trees in either method.

SPRAYING

THE necessity of spraying is acknowledged by all authorities as being one of the requirements of successful fruit growing. An enormous amount of money has been spent during the last few years in every state in the union for the study of sprays and mixtures and the value of each. Spraying not only insures better fruit, but more of it, greatly increasing its quality and value.

TABLE FOR SPRAYING

	1st Application	2d Application	3d Application	4th Application
Apple	Before buds start, Copper Sulphate solution and Arsenite.	After the blossoms have formed but before they open.	Within a week after the blossoms fall, Bordeaux Mixture and Arsenite.	2 weeks later, Bordeaux Mixture and Arsenite.
Cherry	Before buds open, Bordeaux.	When the fruit has set, Bordeaux.	2 weeks later, Bordeaux or Kerosene.	2 weeks later if necessary, Bordeaux and Arsenite.
Pears	Before buds open, Bordeaux.	When the blossoms have formed but before they open, Bordeaux or Kerosene.	Within a week after the blossoms fall, Bordeaux or Kerosene.	Repeat in 2 weeks if necessary, Bordeaux Mixture or Kerosene.
Plums	Before buds open, Bordeaux. <i>Black Knots should</i>	As soon as the blossoms fall, Bordeaux. <i>be cut off and burned</i>	2 weeks later, Bordeaux or Paris green. <i>whenever found.</i>	Repeat at intervals of 2 weeks if necessary.
Peaches	Very early before April 1st, Copper Sulphate.	2 weeks later, Bordeaux.	When the fruit is set, Copper Sulphate.	Repeat in 2 weeks if rot appears, Copper Sulphate.
Quince	Before buds open.	When fruit is set.	2 weeks later.	3 weeks later.
Raspberry Blackberries Etc.	Before buds open, Bordeaux.	When new canes are a foot high, Bordeaux.	2 weeks later, Bordeaux.	
Grapes	Before buds open, Copper Sulphate and Paris green.	When the leaves are half grown, Paris green.	When the fruit is set, Paris green.	Repeat in 3 weeks if necessary, Paris green.
Gooseberries	As leaves open, Bordeaux.	Repeating in 2 weeks, Bordeaux.	2 weeks later, Bordeaux.	Repeat in 2 weeks if necessary, Bordeaux
Currants	As soon as worms are found on lower and inner leaves, Bordeaux.	If worms reappear, repeat in 2 weeks, Bordeaux.	Repeat in 4 weeks if necessary, Hellebore.	After fruit is picked, Bordeaux freely.
Strawberries	Just as the blossoms open, Bordeaux.	After fruit is set, Bordeaux.	As soon as berries are harvested, Bordeaux.	

BORDEAUX MIXTURE

Copper Sulphate - - - 6 pounds
Quicklime - - - - 4 pounds
Water - - - - - 45 gallons

To destroy leaf-eating insects, add four ounces of Paris green. For Peach, use three pounds each of copper sulphate and lime, and three ounces of Paris green, on account of the tenderness of the foliage.

We recommend crude petroleum, 20 to 25% with water, for Apples, Pears, Plums, etc., and whale-oil soap, full strength and quantity, for Peaches.

ARSENITE OF LEAD

Arsenite of Lead, 1 lb. Water, 150 gallons.

HELLEBORE

Fresh White Hellebore, 1 oz. Water, 3 gallons.

KEROSENE EMULSION

Hard Soap - - - - - ½ pound
Boiling Water - - - - - 1 gallon
Kerosene - - - - - 2 gallons

TOBACCO

Boil tobacco stems, and use at the rate of two gallons to each pound of stems, for sucking insects.

AMMONIACAL COPPER CARBONATE

Copper Carbonate, 5 ounces. Ammonia, 2 quarts
Water, 50 gallons.

The copper carbonate is best dissolved in large bottles, where it will keep indefinitely, as it should be diluted with water as required. For the same purpose as Bordeaux.

COPPER SULPHATE SOLUTION

Copper sulphate, 1 pound. Water, 25 gallons.

This should be used only before the foliage appears. It is easily applied, and acts as a general germicide and disinfectant. In simple solution copper sulphate is very injurious to foliage. When lime is added, as in making Bordeaux mixture, its corrosive action is neutralized and injury to the foliage prevented. In this way a larger quantity of bluestone may be used, and it adheres to the foliage better by the agency of lime.

50 Trees at 100 rates; 500 at 1000 rates.

The following is a list of varieties best known for commercial and garden purposes. These are arranged as nearly as possible in their order of ripening.

FALL BEARING APPLE TREES

Early Harvest

Early Harvest—Medium size; pale yellow, with a mild, fine flavor and popular as a dessert and cooking Apple. Ripens early and is long in season. Very productive. Middle to end of Aug.

Yellow Transparent

Yellow Transparent—Very early Russian Apple; good quality and of decided merit. Color when ripe pale yellow. Earliest of all Apples, of a mild, pleasant yet sprightly flavor. It bears abundantly and at an extremely early age. Three year trees in the nursery rows frequently produce fine fruit. It should be in every home garden.

Red Astrachan—A medium sized, very beautiful Apple with a yellow skin nearly covered with light and dark red patches. Its appearance makes it bring a very good price on the market. In flavor it is acid and makes a fine cooking variety. The tree is a vigorous grower, very hardy and productive.

Sweet Bough—A large pale yellow Apple, one of the really good summer varieties and best early sweet Apple. Sweet Bough ripens through a long season, the tree is a very young and prolific bearer and long lived. This variety should be in every orchard. Fruit begins ripening in August.

Duchess of Oldenburg

Duchess of Oldenburg—A summer Apple that is planted extensively as a filler in orchards, as it bears when very young and its fruit brings a good price on the market. The tree is very hardy, thrifty and productive. One of the best varieties for the northern climate. Fruit is medium to large in size. Skin yellow streaked and almost covered with dark red carmine. Flesh is tender, fine, firm, juicy, sub-acid. One of the best for all culinary purposes. We recommend Duchess as a fine Apple for orchard or garden planting. Fruit ripens in September.

All First-Class—XXX Grade Stock—
Good Roots and Tops

Maiden Blush

Maiden Blush—This is a beautiful Apple of pale lemon-yellow color with crimson cheek. The flesh is white, fine quality, crisp, tender and very juicy. It is one of the best Apples for drying that can be grown, as its flesh dries to a pure white color. The fruit ripens in September and October. The tree is vigorous in growth and is used a great deal by fruit growers as a filler in orchards. Maiden Blush will bear fruit when very young and bring good prices on the market.

Fameuse or Snow Apple—This is a handsomely striped red Apple of good quality and is very hardy. Flesh is snowy white, tender, juicy and delicious. In demand as an eating Apple.

King of Tompkins County—One of the standard varieties grown for commercial purposes, and gives the greatest satisfaction when top-worked on some hardier variety. The fruit is of a bright red color, large and uniform. It is well adapted for marketing in fancy packages and is in good demand for both special and general trade, often selling at an advance over standard varieties in both domestic and foreign markets. The flesh is yellowish, crisp, tender, juicy and sub-acid, and of the best quality. It keeps in cold storage until February or later.

Gravenstein

Gravenstein—This is a large, handsome Apple streaked and splashed with red over a strong yellow. The flesh is yellowish, firm, fine, crisp, tender, juicy and sub-acid. In quality it ranks very good to best. The tree is a strong grower and a regular prolific bearer. Growers are making fine profits from this variety. The season of Gravenstein is the latter part of September until the early part of November.

APPLE TREES—(Continued)

Wealthy—A large smooth Apple with a pale yellow skin blushed and marked with stripes and splashes of red. It is very beautiful and attractive. The flesh is white sometimes stained with red; fine, crisp, tender, very juicy, fine quality. Wealthy is a

good keeper in storage and is very profitable as a market sort. The tree is hardy and a young and prolific bearer. We recommend this as the best of all kinds for use as a filler in orchards. Season Oct. to Jan.

Wealthy

WINTER VARIETIES

Wolf River

Wolf River—One of the largest of all Apples—it resembles the Alexander but is better and more popular among fruit men as it is very hardy and can be grown both north and south. Striped and blushed with bright red, it is a very handsome fruit. Season is from November until April.

Hubbardson Nonesuch

Hubbardson Nonesuch—"Hubbardson is an excellent variety for commercial planting and deserves to be better known among New York fruit growers."—From the Apples of New York, by the Department of Agriculture, New York State.

This is a large, roundish, smooth Apple with a yellow skin mottled and splashed with bright red. The flesh is firm, fine grained, tender, crisp and juicy; in quality very good to best. Season is from Oct. to Jan. The tree is vigorous and bears when young, making it a very valuable orchard variety.

APPLE TREES—(Continued)

McIntosh Red

McIntosh Red—A very attractive Apple of a deep red color and of good uniform size. The flesh is white, firm, crisp and tender. Its season is from October until May. The tree is a vigorous, strong grower and will bear from about four to five years from planting. McIntosh bring a good price on the market and makes a profitable investment for the fruit grower.

North Western Greening

North Western Greening—A very hardy and vigorous variety. Tree is a strong, clean grower and a very productive and reliable cropper. Fruit is large, greenish yellow, juicy and sub-acid. Is an excellent cooking kind and a splendid keeper. Season is November until May.

Talman Sweet—Splendid sweet winter Apple. Light yellow in color with a faint blush cheek. Tree is a good grower, long lived and very hardy. Comes in bearing at an early age and is a reliable cropper. Season November to April.

Nearly Twenty-Five Million Dollars Worth of Fruit Produced in New York State in One Year

Here are the figures, taken from the New York State Agricultural Bulletin, "Fruit Produced in New York State" by Chief Geo. G. Atwood, June, 1913.

The value of all fruit produced in the State of New York according to the last census is as follows:

Apples	-	-	-	-	\$13,343,028
Peaches	-	-	-	-	2,014,088
Pears	-	-	-	-	1,418,218
Plums	-	-	-	-	519,192
Cherries	-	-	-	-	544,508
Apricots and Nectarines	-	-	-	-	14,490

Small fruits	-	-	-	-	2,875,495
Grapes	-	-	-	-	3,961,677
					\$24,826,041

One of "Wood Quality" Jonathan Apple Trees planted four years ago by Mr. Wm. Powley of Lyndonville, N. Y.

Jonathan—Is of the Spitzenburg class. It is very beautiful, of a brilliant red color, highly flavored, and of excellent quality for either dessert or culinary use. It excels its parent in hardiness, productiveness, health and vigor—comes into bearing young, but requires a fertile, well tilled soil. The flesh is whitish, sometimes tinged with red. It brings a fancy price at the holiday season.

Woodlawn Golden Pippin—Is one of the very best varieties. The Apple is golden-yellow, with a delicious flavor. The flesh is firm, crisp and juicy. It is the best Apple for baking that can be grown. The tree bears at an early age—one of the best keepers, and one of the last Apples on the market in the spring. It should be in every garden. Price, 50c each; \$4.50 for 10.

APPLE TREES—(Continued)

Baldwin

Baldwin—The Baldwin is the leading commercial variety in the orchards of New York, Pennsylvania and Ohio. It is the standard fruit in the American markets and is one of the leading Apples used in cold storage for the export trade. It is a large, red winter Apple and is very desirable on account of its size, color and quality. The tree is a strong grower, long-lived and vigorous, and yields a uniform grade of fruit with very few culls. Fruit keeps in common storage until April; cold storage until May or later.

Stayman Winesap

Stayman Winesap—Medium to large; uniform in size and shape; red tinged with yellow. The flesh is crisp, juicy and tender. It is one of the best of all commercial varieties for south of New York State or west of the Mississippi. December to May

Rhode Island Greening

Rhode Island Greening—This Apple is of the highest quality and ranks next in popularity to the Baldwin. The tree is a strong and vigorous grower, does not come into bearing very young but, when well grown, produces a large percentage of high grade fruit that is smooth, uniform and large, with very few undersized Apples. The skin is thick and tough, and grass-green or yellow in color. The flesh is yellowish, firm, crisp, tender and sub-acid. In growing the tree it should be headed high as, when it gets older, the branches become long, wide-spreading and drooping, especially when loaded with fruit. In ordinary storage its season is from October to February, but in cold storage it may be held commercially until April.

Winter Banana

Winter Banana—A magnificent dessert Apple—very handsome golden-yellow tinted red on sunny side. Flesh is yellowish-white, tender, mild and sub-acid; flavored like a banana. This Apple comes in bearing very early and bears annually. The fruit sells for the highest price on the market—packed in boxes for fancy trade. December to April.

APPLE TREES—(Continued)

Rome Beauty

Rome Beauty—A large, smooth, uniform sized Apple beautifully shaded and striped with red. It is an annual bearer and coming into great prominence in all parts of the country. Its fine quality and handsome appearance make Rome Beauty bring the highest prices on all markets. There is always a ready sale for this variety. It is thick skinned and stands handling remarkably well. Rome Beauty blooms late which insures it against late frosts and makes it a tree that can be relied upon even when other kinds fail. Rome Beauty can be recommended as a fine commercial variety for any part of the country. Season February to May.

York Imperial

York Imperial—It is one of the leading Apples in Pennsylvania and the middle Atlantic States and over a belt of country extending west into Missouri and Kansas. The skin is tough, bright, smooth; blushed and striped with scarlet. The flesh is yellowish, firm, crisp, tender and of good quality. Season, April or May.

Gano—This Apple resembles the Ben Davis very closely. Fruit is more highly colored. It is very attractive in appearance, stands handling well, and is a good keeper. Tree comes into bearing young and is an excellent cropper, bearing regularly and abundantly. The flesh is tender, juicy, mild, sub-acid. Season, December to May.

Spitzenburg — Medium sized Apple completely covered with red. The flesh is of good quality, crisp, juicy, sub-acid. When well grown and packed in boxes the fruit brings a very handsome price. Its season is between R. I. Greening and Baldwin. In cold storage Spitzenburg may be held until June.

Northern Spy

Northern Spy—This variety ranks about third in commercial importance with the fruit growers of Pennsylvania, New York and Ohio, being surpassed by Baldwin and R. I. Greening. Fruit is large and very attractive, being of bright red color with a delicious bloom; flesh is very juicy, crisp, tender and excellent for dessert or culinary uses. Its fine reputation brings high prices in the market and the fruit is always in demand. The fruit is ready for use in November or December; keeps well in cold storage until April, or if more carefully handled, until May. The tree is very strong and a thrifty grower; orchard trees should stand 40 to 50 feet apart to prevent them crowding. Because of its thrifty habits, the Northern Spy is often used to topwork other varieties on and many are planted expressly for this purpose.

Sutton Beauty—An Apple with good quality and is a good keeper. A large, roundish fruit with a waxy yellow skin striped with crimson. Flesh is tender, juicy, crisp and sub-acid. Tree is a vigorous grower and very productive. A valuable market variety, brings a high price for fancy market and fruit-stand trade. Season, November to April.

APPLE TREES—(Continued)

Wagener

Wagener—A superior Apple. The color is a beautiful bright red with some contrasting pale yellow. It has a fine texture, high flavor, and excellent quality. It is desirable for culinary use, but is especially esteemed for dessert. Wagener is a good grower, comes into bearing at an early age, and is a reliable cropper. It is planted a great deal as a filler for orchards. Season, Oct. to Feb. or later.

Stark

Stark—This variety is considered one of the good commercial kinds. The tree is thrifty, hardy, healthy and a reliable and productive cropper. The fruit is large, the skin is smooth, pale green or yellow blushed and mottled with red and darker red stripes. Brings high prices in the market. The flesh is yellowish, firm, tender, juicy with a slightly sub-acid flavor, and is of very good quality. It stands handling well and can be kept in ordinary storage until May or June.

Grimes Golden

Grimes Golden — Beautiful, rich, golden yellow colored Apple with flesh that is tender, juicy and rich. Early, an annual and good cropper, a vigorous and hardy grower. This variety comes into bearing when young and makes a good filler. Season is from November to January.

Ben Davis

Ben Davis—A leading commercial sort. The fruit is medium to large, of a deep red color, or red striped over yellow. It is a very popular Apple in the south and west and is being planted more each year by the fruit growers of this State. It is a very early bearer and one of the best keeping Apples on the market today, lasting in cold storage until June or July. Its habit of blossoming late in the spring is a great advantage in some regions, as the weather is then apt to be more favorable during the pollinating period—the result is that Ben Davis, in such cases, often bears a heavy crop where other varieties fail.

SELECT CRAB APPLES

As an ornamental fruit, and for jellies, preserving, etc., the Crab Apple is unequalled. All are very hardy and prolific, come into bearing when very young, and command a ready and profitable market.

PEARS

PEARs do best in a strong loam, but succeed well in a variety of soils and on almost any land that will produce good vegetables or grain. There is always a greater demand than supply of Pears of all varieties. Bartlett is, of course, the leading Pear and calls for the highest price in the market. By a careful selection of varieties the Pear season can be extended

from July to February. Pear growing has been checked until lately by blight, which has affected this kind of tree, but this condition need not exist in the future. Dr. Waite, a practical Pear specialist, who has done much for the industry in the West, has shown that this blight can be controlled. Bulletins on this subject may be secured from the Department of Agriculture at Washington.

Following is a list of the best known varieties of Pears and prices of each:

SUMMER PEARS

PRICES OF STANDARD PEARS

	Each	10	100	1000
5 to 7 ft., XXX Grade	35c	\$3.00	\$25.00	\$240.00
4 to 5 ft., XX	30c	2.50	20.00	190.00
3 to 4 ft., X	25c	2.00	15.00	140.00

Clapp's Favorite—This is without doubt the most productive Pear on the market. It is of very large size. It has a pale lemon yellow color with a bright crimson cheek. The flesh is fine grained, juicy, melting and buttery. A cross between Bartlett and Flemish Beauty; earlier than Bartlett and resembling Flemish Beauty in growth. It is as hardy as the grower and excellent. The fruit should be picked at least ten days before it would ripen on the trees. Pears ready to pick in Aug. and Sept.

Clapp's Favorite

Bartlett

Bartlett—The best and most popular of all Pears both for market and home use, large size, rich golden yellow with beautiful blush cheek; highly flavored, juicy and buttery. It is a vigorous grower, bears very abundantly at an early age, and is an annual bearer. Season, Aug. and Sept.

ALLEN L. WOOD, Rochester, N. Y.

FALL AND WINTER VARIETIES OF PEARS

A Six-Year-Old Kieffer Orchard "Wood Quality" Trees—Mr. Albert Brand, Middleport, N. Y.

Kieffer—A popular Pear with fruit growers. Large, rich, yellow, tinged with red, somewhat russet. Very handsome. Flesh is white, buttery and juicy. Very valuable for canning purposes. Kieffer bears fruit when other kinds fail. Tree is a vigorous grower, early and regular bearer, extremely hardy. Immensely productive, bears young. September to November.

No. 7

STANDARD PEAR COLLECTION

6 TWO-YEAR-OLD TREES FOR - - **\$1.43**

- | | |
|-----------|--------------------|
| 1 Anjou | 1 Lawrence |
| 1 Wilder | 1 Flemish Beauty |
| 1 Sheldon | 1 Clapp's Favorite |

6 Trees for \$1.43

Sheldon

The Sheldon Pear—This is one of the large sized kinds. It is roundish in shape and has a greenish-yellow color covered with light russet. It is very juicy and melting, and has a sweet and tasty flavor. The tree is a fine grower and a good bearer. Its season is October and November.

PEARS—(Continued)

Anjou

Beurre d'Anjou — This is one of the most popular and valuable Pears one can buy. A large handsome fruit, buttery and melting with a fine vinous flavor. It is a fine keeper and will stay good until mid-winter. The tree is a vigorous grower and a good bearer. Should be picked in the latter part of October or first of November.

By buying Trees from the grower you save nearly 50 per cent. on your order and get better Trees—true to name—"Wood Quality" stock.

Duchess

Duchess (Angouleme)—A young bearing tree, often fruiting the first season after planting. The fruit is large, frequently weighing a pound. It is of a dull greenish-yellow, spotted russett color. The flesh is white, rich and of very good quality. **Duchess** is a very dependable cropper and an all around good profitable market Pear. It is valuable both as a standard and dwarf. Standard **Duchess** are being planted largely in Michigan and are succeeding finely.

A Three-Year-Old Pear Orchard—Trees Planted Out by Mr. Wm. Powley of Lyndonville, N. Y. All "Wood Quality" Trees.

PEARS—(Continued)

Seckel—
Very prolific bearer

Seckel—Our most highly flavored Pear, the standard of excellence. Fruit small, yellowish brown, with a russet-red cheek; flesh very juicy, melting, aromatic, with a rich, spicy flavor; quality very best. September and October.

Worden Seckel—This great Pear is a seedling of Seckel, but far surpasses it in size, color, form and beauty. It resembles the Bartlett in shape, but is not so large. Fruit is light golden in color with a deep red blush on sunny side. The flesh is white, sweet, juicy and of fine quality. One of the best, most popular Pears in the country. Tree is vigorous, very hardy and bears very young. It is an enormous producer. Ripens just after Seckel. October.

Flemish Beauty

Rossney

Rossney—Exceedingly large and handsome. Skin is pale yellow with a crimson blush. The flesh is melting, juicy and sweet. It is very tender and has a delicious flavor. The tree is a very strong grower and very hardy. It equals Kieffer in these respects. It ripens when Pears are in good demand. October.

Flemish Beauty—This is a pale yellow Pear almost covered with light russet, which becomes reddish-brown when ripe. The fruit is large, beautiful, melting, sweet and rich. The tree is very hardy, but needs sunny situations or the fruit will crack and scab. When perfect it is a superb Pear. It is a great bearer and fruit ripens during September and October.

*Remember how the Department
of Agriculture advises you to
buy your Trees and Plants*

*“Direct from
the grower”*

*We have been growing trees for
thirty-eight years.*

DWARF PEAR TREES

on Quince Roots

THE dwarf varieties require less than one-fifth the space necessary for the standard varieties, and though the tree is dwarf the fruit is same size as standard, and is borne in large quantities. It is valuable both for the home garden and orchard planting for commercial purposes. It is a good filler for Apple or Standard Pear orchards, because it is an early bearer and takes up but a small space. Trees should be planted ten feet apart.

Duchess
Best of all Dwarfs

PRICES OF DWARF PEARS

3 to 4 ft., XXX Grade
2 to 3 ft., XX “

Each	Ten	Hundred
30c	\$2.50	\$20.00
25c	2.00	15.00

Duchess—The most popular of all dwarfs and the one most widely grown. Duchess is a great yielder and a great money getter. The tree is hardy and thrifty and bears uniformly big crops. It is a very early bearer, sometimes fruiting the first season after planting. The fruit is very large, frequently weighing a pound; dull greenish-yellow, spotted with russet; flesh white, rich and of good quality. A very valuable Pear for the home garden or commercial orchard.

Bartlett—Dwarf Pears are similar to the standard fruit of the same variety, and are very profitable when used as fillers for orchards. Many fruit growers plant Bartlett dwarf as fillers in standard Bartlett and Anjou orchards. In many parts of the country they are planted as fillers in Apple orchards.

Clapp's Favorite—This is a very good dwarf variety which is used extensively for fillers in orchards, mainly Apple orchards. The one trouble with this pear is that it is susceptible to blight.

Beurre d'Anjou—A great money-making dwarf that should be extensively planted. When used as a filler in orchards of standard Anjou and Bartlett it is unexcelled; the dwarfs will have paid for the orchard and more by the time the standard trees are in full bearing. We recommend this highly to our customers.

Seckel—This variety is valuable, both as a standard and dwarf. Fruit is the same on either tree. This makes a good filler for an Apple or standard Pear orchard.

or More**

SEE PAGE 11

Seven-Year-Old Bender Cherry Orchard in Bloom—Fruit larger than Montmorency; trees fully as productive

CHERRY

THE CHERRY being a very hardy tree will thrive on nearly any good soil, but does best in a warm, dry, sandy, gravelly, or clay loam. The most important thing is to have the soil dry; no other fruit is so greatly injured by excessive moisture as is the Cherry.

The Cherry is one of the most profitable, if not the most profitable of all the fruits that are grown. More and more the fruit growers of the country are taking up its culture and enormous profits are being realized from young orchards. Cherries are divided into two classes, sweet and sour.

We have for sale this spring the finest Cherry trees we have ever grown.

PRICES OF SWEET AND SOUR CHERRIES

	Each	Ten	Hundred	Thousand
5 to 7 ft., XXX Grade	35c	\$3.00	\$25.00	\$225.00
4 to 5 ft., XX "	30c	2.50	20.00	175.00
3 to 4 ft., X "	25c	2.00	15.00	120.00

Bender—The Bender Sour Cherry is the newest and best of all sour cherries. The fruit is far ahead of Montmorency in size, color, quality and quantity. It ripens between Early Richmond and Montmorency. Bender was found growing in a fence corner by one of our customers who lives in central Michigan. Several years ago

Bender

he sent us some buds from his tree, which we budded for him and for several other fruit growers in Michigan. There has been such a demand from Michigan for the Bender that we are growing a large block of these trees and are offering them to our customers in other states. This is a coming Sour Cherry and we advise our customers to try a few of them. We sell all Bender Sour Cherry trees under a special guarantee seal that is affixed to each tree or bundle of trees of this variety. None are genuine or true to name that are sold without this seal or by anyone other than the Woodlawn Nurseries, Rochester, N. Y. Prices, 50c each; \$4.00 for 10; \$35.00 for 100.

SOUR CHERRIES—(Continued)

English Morello

English Morello—Medium sized Cherry of a very dark red color, sometimes nearly black. It is very acid in flavor, the flesh is of good quality and it makes a fine canner. Tree is a small grower with light limbs and trunk. Ripens in July.

We prepay freight charges on orders of Ten Dollars or more. See page 11.

Dyehouse

Dyehouse—One of the best Sour Cherries for market or home use. It is larger, finer, of better quality and has a smaller pit than Early Richmond. The tree is hardy, is an upright grower and always productive. The great quality of this variety is its tendency to hang on the tree after it is ripe. Several varieties that ripen later can be picked before this Dyehouse Cherry drops.

Montmorency—Best of the Sour Cherries

Montmorency—This is the best of all the sour varieties of Cherries. There is a greater demand on the market for this Cherry than for any other. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearers of the best fruit of all other sour varieties. No matter how unfavorable the season may be, Montmorency can be depended upon for a full crop. The Montmorency is a good shipper, very attractive looking and always brings good prices. The canning factories are always calling for them and want them by the hundreds of tons. The fruit is good sized, fine flavored and bright clear shining red. The flesh is of fine quality and sub-acid. Fruit ripens 10 days after Early Richmond.

Early Richmond—One of the most popular of all the acid Cherries. It cannot be surpassed for hardiness or for cooking purposes. The fruit is of medium size, round and dark red. The flesh is tender, juicy and sub-acid. The tree is a wonderful bearer. Fruit ripens in June.

1 Bender Sour Cherry Tree with the first 1000 collections sold. First-class trees, \$2.16

SWEET VARIETIES

(Hearts and Biggarreaus)

Black Tartarian

Black Tartarian—This is a large, black, heart-shaped, tender, juicy, Sweet Cherry of surpassing quality. The tree is an upright, dense grower, remarkably vigorous and a regular bearer of immense crops. In 1910 a fruit grower in Michigan produced fruit from this tree which sold at the rate of \$4000 per acre. Fruit ripens last of June or first of July.

Lambert—
A fine Black
Cherry

Lambert—A wonderful variety of the Sweet Cherry and one of the largest. The skin is dark purplish-red, almost jet-black when ripe. Flesh is firm, rich and juicy. The tree is hardy, a strong grower and an enormous bearer. There is an enormous market for the growers of Sweet Cherries. Western fruit men are taking advantage of this, why not Eastern growers?

Schmidt's Biggarreau—The fruit is of very large size, of a deep mahogany color. The flesh is dark, tender, very juicy, with a fine rich flavor. Fruit grows in clusters. It is an excellent shipper and brings good money on the market.

Cherries Net \$500 per Acre

Mr. Conrad Baker of Greece, N. Y. sold \$1700 worth of Cherries from 2½ acres. The picking cost him about 1c per lb. and that together with cost of cultivation, spraying, etc., left him a net profit of \$500 per acre. "Wood Quality" trees well taken care of are bound to make money for you.

Gov. Wood

Gov. Wood—One of the finest of the high colored Cherries. Fruit is large, tender, juicy and of fine quality. The tree is vigorous and productive, one of the best shaped trees of all the Cherry varieties. Fruit ripens in June and hangs well on the tree. We recommend this Cherry very highly.

Bing—This is one of the most delicious Sweet Cherries that you can grow. The tree is very hardy and vigorous and has heavy foliage. It succeeds in the east better than most sweets. Fruit is large, dark brown or black and of very fine quality. Bing is a good shipper and should be planted with Lambert for commercial purposes.

SWEET CHERRIES—(Continued)

Napoleon or Royal Ann—A Fine Yellow Cherry

Napoleon or Royal Ann—This is one of the largest and best of all the Sweet Cherries. It is a magnificent variety, large, sweet, pale yellow, with a bright red cheek. It is a splendid shipper and fine for canning. To eat out of the hand it is unsurpassed. Flesh is very firm and juicy. The tree a fine grower and an immense bearer. Cherry growing for canning is becoming a great industry in the West, where Napoleon, Bing and Lambert are being planted by the hundreds of acres. It will not be long before Eastern fruit growers will be growing this fruit as the canneries are calling for it, and the demand will always be far greater than the supply.

Yellow Spanish—A pale yellow Cherry with a bright red cheek in the sun. Flesh is firm, juicy and delicious. Most beautiful and popular of all light colored Cherries. Tree is upright, vigorous and productive. Fruit ripens at the end of June.

Windsor

Windsor—The tree is very hardy, very vigorous, and very prolific. It is the most valuable late Sweet Cherry for family or commercial use. The fruit is large and liver colored, very handsome. The flesh is remarkably firm and of fine quality. Fruit is ripe in July.

38 Years of Wholesale Tree Growing

We call your attention to the number of years we have been growing and selling Trees direct to the fruit growers, for the reason that those who desire the best trees should send their order to us.

See our Premiums—We give away extra Trees and Plants with \$5, \$10 and \$20 orders—"Wood Quality."

PLUM

THE Plum does best on a strong clay soil, dry and well drained. Here it grows the most thriftily and with cultivation suffers least from "Curculio" or "Black Knot." There is little trouble in keeping the trees free from insects and disease. After the blossoms have fallen spread a sheet on the ground under the tree. Then jar the tree so as to shake down the stung fruit and insects. These should be burned. This should be done every day for a week or more and it is important that it is done early in the morning.

3 to 4 ft., X " "	25c	2.00	15.00	140.00

Abundance

Abundance—One of the most popular of all Japanese varieties. It is favorable everywhere and should be in every collection. The fruit is large, showy and beautiful. It has a bright cherry-red color. The flesh is yellow, firm, juicy, sweet and very delicious. Stone is small and parts freely from the flesh. Its season is very early, which adds greatly to its value. The tree is vigorous and exceedingly productive.

Bradshaw

Bradshaw—This is a very large, dark violet-red Plum, very juicy and good. The quality of Bradshaw is very fine and is very popular wherever planted. The tree is erect, vigorous, hardy and very productive. One of the finest for market and canning purposes. The fruit ripens about twelve days after Abundance.

Red June

Red June Japan Plum—This variety is just as productive as Abundance; fruit medium to large, deep vermillion-red with handsome bloom, very showy; flesh light lemon-yellow, slightly sub-acid. It is of immense value for its very early ripening, and its quality excels all of the early Japanese varieties; it is exceptionally free from rot. Tree comes into bearing in two or three years. Ripens last of July or early in August.

PLUMS—(Continued)

Shipper's Pride

Shipper's Pride—This wonderful Plum originated in New York State. It is very hardy and productive. Fruit is of large size and nearly round; color handsome dark purple; quality fine, juicy and sweet; excellent for canning and an unusually good shipper. A great market Plum. Ripens from first to middle of September.

Lombard

Lombard—A reddish Plum. It is a great favorite because it is a wonderful and early bearer and a hardy grower. Fruit hangs so thickly on the trees that it must be thinned. It is a good eating and canning variety. Flesh is yellow and juicy. It can be relied on for a crop when other varieties fail. Ripens in August.

Burbank

Burbank—This variety is very much like the Abundance, except that it is much deeper in color, and ripens from ten to fourteen days later. It is one of the handsomest Plums on the market and always finds a ready sale. The fruit is large, reddish purple; flesh yellow, juicy and good. Tree is very hardy and vigorous. It will withstand the frost better than most varieties. We recommend this very highly to our customers.

Reine Claude

Reine Claude—A delicious greenish-yellow Plum, spotted with red. It is of the finest quality and the housewife's ideal Plum for canning and preserving. One of the finest for quality, beauty and size. Ripens in September.

PLUMS—(Continued)

Wood's Improved German Prune

Wood's Improved German Prune—Best of all Prunes for drying. This is a strain of the old German Prune which we have improved until we now can offer a Prune that is larger, better, more uniform in size and of better color than the old variety. This Prune is of a dark blue color, juicy, rich and delicious. The tree is upright, vigorous and very productive. This strain ripens in Sept.

Wickson

Wickson—Japanese variety. It is a fine market variety; always sells well, as it is very handsome, large, and of fine quality. It is a large, long heart-shaped Plum of a deep maroon red color, covered with white bloom; flesh is firm and meaty, yellow, rich and delicious. The tree is an upright, vigorous grower and hardy. Fruit ripens in early Sept.

Felleberg

Felleberg (Italian or French Prune)—This is a dark purple Plum with a dark blue bloom; size is medium, oval, pointed and tapering. Flesh juicy and delicious; fine for drying. In the west it is grown by the thousand of acres and shipped by the train load to all of the markets of the world. The tree is very vigorous and free growing. Ripens in September.

Buy Direct from the Grower

In the Farmer's Bulletin, No. 113, of the United States Dept. of Agriculture, it says: "If the farmer makes his purchase direct from the nurserymen, he will save the expense of the middleman or agent, and is less liable to the mistakes and injuries that occur through repeated handling."

1 Geuii 1 Shipper's Pride 1 Monarch
1 Wood's Improved German Prune

Seven Fine Trees All First Class \$1.83

Shropshire Damson

Shropshire Damson—An English variety of Plum and very fine for preserving. It is a roundish blue fruit and always sells well; the tree is hardy and very prolific. Fruit ripens in October.

Yellow Egg—A large and beautiful Plum. Very fine for cooking purposes. The tree is very vigorous and productive. Ripens in August.

PEACHES

PEACH growing is today a great industry and there are a great many young orchards being planted throughout the country. The ease with which these trees may be cultivated, their freedom from disease, the short period before they become productive, together with the immense demand for the fruit and the facility with which it may be shipped to markets, make Peach growing extremely profitable.

To secure healthy, vigorous and fruitful trees the ground must be kept clean and mellow, and should receive an occasional dressing of wood ashes.

To keep the trees in good shape it is necessary that they should be pruned yearly, all the dead and useless wood cut out and light and air let in.

In growing Peach trees we renew our buds every three to five years by taking buds from bearing trees in some of the best orchards in the state, so as to avoid as far as possible the danger of mixing in varieties which is so easy to occur when they are grown from buds cut year after year from the nursery rows, without this renewal from stock that is known to be true.

"Wood Quality" Trees planted in 1908 by Mr. T. Merchant, Middleport, N. Y. Each tree yielded from five to eight bushels of fruit this past season.

PRICES OF PEACH TREES

	Each	Ten	Fifty	Hundred	Thousand
4 to 5 ft., XXX Grade	25c	\$2.00	\$6.50	\$12.00	\$110.00

2 to 3 ft., X "	15c	1.00	3.00	5.00	45.00

Champion

Champion—This is a vary large variety, some of the fruit will measure over 10 inches in circumference. It is very hardy and productive. Both the tree and the fruit buds have stood 18° below zero and produced a full crop the following summer. Has a very fine flavor, is sweet, rich and juicy. The skin is creamy-white with a red cheek and very handsome. The tree is very productive and the fruit a good shipper. Ripens last of August.

PEACHES—(Continued)

Crawford Early—One of the best commercial varieties; fruit is very large; skin is yellow with a red cheek. Flesh of this Peach is yellow and of good quality. It is a freestone variety. Tree is very vigorous and productive and very popular and extensively planted. Fruit ripens first of September.

See cut of FIVE YEARS OLD EARLY CRAWFORD PEACH ORCHARD on front cover. Each tree yielded from FIVE to SIX BUSHELS.

Crawford Early

Yellow St. John—This is a large handsome Peach and very popular wherever it is grown. The flesh is yellow, rich and juicy. The flavor is equal to that of the Crawford. It ripens the latter part of July and is a profitable market variety on account of its earliness. Yellow St. John is a perfect freestone Peach. Tree is strong and vigorous.

Greensboro

Greensboro—A hardy, early Peach ripening the latter part of July. It is beautiful in appearance; a large white Peach, one side covered with light and dark crimson, and freestone when fully ripe. We regard this a valuable market variety.

Its large size, attractive appearance and reliability in bearing combine to make it one of the best of its season."—Ohio Ex. Sta. Bull. 170.

Yellow St. John

PEACHES—(Continued)

Mr. C. Yaxley of Medina, N.Y., purchased several hundred Peach Trees from us in 1908—The result

Elberta—The Greatest Money-Maker of Them All

Elberta—The greatest commercial Peach on the market today. This variety is the most popular all over the country and there are more of these grown than of any other kind. It is undoubtedly the best orchard kind and also is valuable for garden planting. The tree is very hardy and a productive and uniform cropper. The fruit is large, yellow with red cheek; it is juicy and high flavored. Flesh is yellow and fine. It is a freestone Peach and ripens about 10 days later than Early Crawford.

See cut of **THREE YEARS OLD ELBERTA PEACH ORCHARD** on front cover. Each tree yielded over one bushel.

Carman—A new hardy rot-proof Peach, ripening at same time as Early Rivers, yet almost as large and fine as Elberta. Skin pale yellow with blush on Sunny side; flesh white, tender, sweet and melting. ships well; middle of August. Freestone.

Carman—Hardy and Early

PEACHES—(Continued)

Fitzgerald

Fitzgerald—Origin Canada. Fully equal to Crawford Early in size, quality and color, with much smaller pit; a very early bearer, often when two years from bud; extra hardy, succeeding in Canada and in Michigan perfectly; fruit large, brilliant yellow with red cheek; highest quality; ripens after Crawford Early. Freestone.

Lamont

Lamont—A new variety which originated near Sodus, N. Y., and which is very profitable and valuable for reason of its lateness of season. Lamont comes on the market when nearly all of the other Peaches are gone. It is larger and much finer than Elberta. Skin is yellow with a red cheek. Flesh is of fine quality, yellow color, juicy and luscious. The tree is vigorous, productive and exceptionally free from all disease. Ripens two weeks later than Elberta. Perfect freestone.

Willett—A freestone variety; bright yellow covered with red; is giving good satisfaction where ever planted out as it is one of the largest and finest Peaches. Ripens in September.

The First Prize for Trees
AT THE NEW YORK STATE FAIR
Held at Syracuse, N. Y., September, 1912
Was Awarded to
The Woodlawn Nurseries

Belle of Georgia—Very large white Peach with red cheek. The flesh is white, firm and of fine flavor. The tree is a very rapid grower and very productive. A freestone Peach and ripens in July.

Belle of Georgia

PEACHES—(Continued)

The above cut shows how to wire up a Peach tree to keep it from breaking down when heavily laden with fruit.

Niagara Peach—The fruit of the Niagara Peach is much like that of Early Crawford in appearance, being large, oval, yellow with brilliant red cheeks. The flavor is rich and piquant, reminding one of the very best peaches he ever ate. The season is medium early, coming in just before Elberta.

Crosby

Crosby—This Peach originated in Connecticut and is very hardy. Has stood very cold weather (22° below zero) without harm. It has proved to be a fine Peach wherever grown, either for the

market or home use. Fruit is very large and yellow and flesh is delicious. It has a freestone and ripens before Crawford late, about the first of September

Woodlawn Golden

✓ **Woodlawn Golden Peach**—A new variety—golden yellow with a red cheek. The fruit is large; flesh is yellow and firm and has a fine, rich flavor. The tree is a strong grower and very productive. It is a perfect free-stone Peach. Fruit ripens first of September. Price, 50c each or 10 for \$4.50.

Crawford Late

Crawford Late—Fruit of the largest size; skin yellow, or greenish-yellow with dull red cheek; flesh yellow; productive. One of the finest late sorts. Freestone. Last of September.

Mr. Conrad Baker of Greece, N. Y., picked this year \$16,000 worth of Peaches from 40 acres. Thirty of these acres were in four to five-year-old trees; ten acres in ten-year-old trees. A five-year-old Elberta would pick sixteen State baskets. From five acres of Elbertas Mr. Baker picked 9000 baskets which brought him 50c per basket. Scientific methods brought this crop. Careful cultivation and correct spraying of the trees. Mr. Baker buys "Wood Quality" Trees for his orchard.

The Champion Quince

QUINCE

FOR best results the Quince should be planted in rich, deep, moist, but well-drained clay soil, it will not stand in wet land. The tree responds quickly to good care and culture. Its greatest enemy is blight, which is combated with the same methods used with Pears. It is a dwarfish grower, and if not controlled will soon develop into shrub or bush, hence "suckers" and water spouts must be kept off and the tops open to sun and air. Quince can be planted 8 to 10 feet apart. Under proper conditions it bears heavily and regularly and is a highly profitable crop, since in all markets the demand for good Quinces is never fully supplied.

Succeeding nearly everywhere as it does, the consumption of Quinces can easily be increased ten-fold.

PRICES OF QUINCE TREES

	Each	10	100
3 to 4 ft., XXX Grade	30c	\$2.75	\$25.00
2 to 3 ft., XX	25c	2.25	20.00

Champion—Will bear more quickly than any other variety. Trees in the nursery row often bear when two years old. The fruit is large and handsome. Flesh cooks as tender as an apple and without hard spots or cores. Very fine for preserves, jellies, marmalades, etc. The tree is vigorous, hardy and very productive. Champion is a fine all around Quince. Ripens in November.

Bourgeat—This tree produces large crops of exceedingly large and handsome fruit, of a rich golden color. It ripens soon after Orange, but will keep until mid-winter. It is very hardy and free from leaf blight.

Orange

TURN to the inside of front cover and see what you are getting when you buy "Wood Quality" Trees and Plants. Thirty-eight years growing trees for you. Our trees can't be beaten—for we know how to grow them.

Orange—More largely planted than any other variety. One of the old varieties that always bear and give good satisfaction wherever planted. Orange is large, bright golden yellow. Cooks very tender and has a great flavor. There is always a demand for this Quince.

APRICOT

THIS is a rich, delicious fruit, coming between Cherries and Peaches. It is very much like the Peach in outward appearance, but like the Plum in quality and texture. The Apricot ripens a month or more before the best early Peaches comes in, which explains the reason for the great demand and prevailing high prices. It should be planted in deep rich soil; and care should be taken to know that the sub-soil as well as the top-soil is dry.

Aside from its value as a fresh fruit, the Apricot has a fixed place on the list of fruits for canning and drying, for which purposes vast quantities are used every year. There is always a market for Apricots and the planter should have no fear of over-production.

Apricot Trees, 35c each ; \$3.00 for Ten

Alexander—A large, oblong, orange yellow fruit, spotted with red. Flesh is sweet, juicy and very good. It is a hardy, prolific bearer and very popular in the east. One of the best of the Russian varieties. Ripens early.

Early Golden—An American variety of Apricot. Fruit is small, pale orange, juicy and sweet. The tree is hardy and prolific. Ripens first of July.

Harris—This variety is remarkable for its size, beauty and productiveness. It is extremely hardy, will stand the severest winter. Fruit is of a rich golden color and of very fine quality. Ripens in middle of August.

Montgamet—A pale yellow Apricot, slightly tinted with red; flesh is firm, juicy and agreeably acid. A popular variety largely grown for the market.

Moorpark—The largest of all Apricots; orange in color with a red cheek. More money is made from these than from any other variety. Flesh is firm, juicy and very fine. Moorpark ripens in August.

Moorpark

“Wood Quality” stock cannot be beaten. Our trees are well rooted and have nicely shaped heads. We send our customers trees that will advertise “Wood Quality.”

"Wood Quality" is obtained only by careful and thorough cultivation.

English Walnuts
as They Grow on the Tree

English Walnut—An exceedingly handsome tree for the lawn. It produces large crops of thin shelled, delicious Nuts which are always in demand at good prices. The English Walnut can be grown in the Eastern and Northern States as well as in California and the South. It is grown successfully in Monroe County, N. Y., and we have some extra nice trees growing in our nursery. 4 to 5 ft. trees, 50c each; \$5.00 per dozen.

The Nuts in the above photograph were picked from a five years old English Walnut tree near our office.

NUT TREES

NUT culture in the United States is in its infancy. Great strides are being made both in the number of Nut Trees planted and the improvement in variety and quality. The constant and growing demand for Nuts, and

the immense quantities of them yearly imported to meet it have given a great impetus to the planting of Nut-bearing trees. So palatable and wholesome are the Nut kernels that they should become a staple article of food here as in Europe. The returns from established Nut-bearing orchards, as well as numerous experiments, show plainly how successful Nut culture may be made in America. Most farms contain land that would pay better planted in Nut-bearing trees than anything else; the Nuts, in many cases, paying better than farm crops of fruits, while the trees are growing into valuable timber.

Until recently little attention has been given to the Nut Fruits. This is unaccountable, considering the pleasure and profit that may be derived from their cultivation, which is, in fact, simplicity itself, requiring only ordinary labor and little expense. Many kinds form excellent shade trees in addition to producing valuable crops of Nuts.

Butternut

Butternut—This lofty, spreading tree is one of our finest native Nut trees, valued for its tropical appearance and beautiful wood, as well as for its Nuts. Produces large, handsome, elongated Nuts with rich, sweet, oily kernel; very nutritious. Cultivation increases the size of the Nuts. The tree grows rapidly and yields large crops in a few years. At present the supply is insufficient for the demand of a single city market. There are large profits in Butternut growing. A small outlay will bring large returns as soon as the trees begin to bear. 5 to 6 ft. trees, 50c each; \$5.00 per dozen.

NUT TREES—(Continued)

Japan Walnut

Japan Walnut—A choice improved variety, grows with great vigor, forming a handsome head without pruning; has withstood a temperature of 20° below zero without injury. The shell is a little thicker than that of the English Walnut, which it resembles in a general way; kernels are meaty, delicate, and can be removed entirely. Tree begins to bear when 2 or 3 years old. **4 to 5 ft. trees, 50c ea.; \$5 per doz.**

A. Y. Cathcart, Bristol, Ind., says:—"I have been raising the Japan Walnut for 18 years and am more than pleased with them. They are very hardy and do well in Maine, Minnesota and Canada, as they have stood 30 degrees below zero without injury. The trees come into bearing young. I have trees three years old that bore Nuts this season; 18 years old, each have three to four bushels. In quality the Nuts resemble the Butternut, being much richer than English Walnut. Trees grow very fast and make a fine shade tree."

Chestnut—Spanish—**H a n d s o m e**, round-headed tree, producing large crops of very large Nuts that sell readily at good prices. Not so sweet as American. Beautiful ornaments for lawn, and valuable shade trees. **4-5 ft., 50c each; \$5 doz.**

Black Walnut

American Black Walnut—A native tree of large size and majestic form, beautiful foliage. The most valuable of all trees for its timber, which enters largely into the manufacture of fine furniture and cabinet ware, and brings the highest price in market. The tree is a rapid grower, producing a large round Nut of excellent quality. They are much relished by all persons, old and young. **4 to 5 ft. trees, 50c each; \$5.00 per dozen.**

Japan Chestnut

Chestnut, Japan. Very distinct from all other Chestnuts, dwarf grower, productive, usually producing Nuts when two or three years old. Nuts of immense size, far surpassing all other kinds; of fair quality. Decidedly ornamental, hardy and productive. **4-5 ft., 50c each; \$5.00 doz.**

NUT TREES—(Continued)

Chestnut—American Sweet—This is the well-known native variety with which nearly everyone is familiar. It is a stately tree, attaining great height when mature. It is beautifully symmetrical, and when in blossom is as handsome as a tree can

American Chestnut

be. It bears a Nut of good quality and seldom fails to produce a good crop. Aside from their crop value, all the Chestnuts are specially desirable for shade purposes and for ornamental planting. Trees 4 to 5 ft. in height, 50c each; \$5.00 per doz.

Chestnuts in Burs

GOOSEBERRY

THE interest in and demand for the Gooseberry is constantly growing. An acre of Gooseberries will yield \$500.00 if properly taken care of. To do the best the plants should be set in clay and moist soil. They should be sprayed with Bordeaux Mixture when the leaves open; then, two weeks later, repeat with the same mixture. They are easily harvested by stripping the branches with a gloved hand; this enables the picker to gather many bushels in a day. All Agricultural Colleges are urging growers to plant Gooseberries because they are profitable.

PRICE OF 2-YEAR-OLD GOOSEBERRY BUSHES

Each	Ten	Hundred	Thousand
20c	\$1.50	\$10.00	\$90.00

If sent by mail, add 3c per plant.

Downing—Large, handsome, pale green, and of splendid quality for both cooking and table use; bush a vigorous grower, and usually free from mildew.

Pearl

Pearl—This variety bears a great resemblance to the Downing. It is very hardy; free from mildew; superior in size and quality. The fruit is pale green—fine for cooking and table use. Pearl is the most productive of all Gooseberries, and is a variety that does well in Canada.

Josselyn—An American seedling of large size, smooth, prolific and hardy, of best quality. Has been tested over a wide extent of territory by the side of all the leading varieties, and so far is free from mildew, both in leaf and fruit, of them all. A wonderful cropper, with bright clean, healthy foliage.

Send us the names of your neighbors, we will be glad to send them our Fruit Books of "WOOD QUALITY" Stock.

Wood's Improved Cherry
Most Productive
Red Currant

CURRENT

THE Current is the earliest ripening of the small fruits, coming in the early summer. It is of pleasant acid flavor, hardy, a free grower, easy to cultivate, and a certain and heavy cropper. Because of its extraordinary hardiness and free growing tendencies, it is often badly neglected, but good clean cultivation and careful pruning will double or treble the size and quality of the fruit and increase the profits. Currants are the most profitable of small fruits. An acre yields from 200 to 250 bushels of fruit, bringing a price of from \$4.00 to \$5.00 per bushel. Plants should be set in rows four feet each way, allowing plenty of light and air. For protection against the Currant worm dust a little white hellebore powder over the bushes when the leaves are damp. Do this as soon as worms appear.

If Currants are to be sent by mail, add 20c per every 10.

The Parcel Post rates do not apply to nursery plants. The rate is 1c for every 2 ounces, and 11 pounds is the maximum weight of any package.

✓ **Wood's Improved Cherry**--A strain of the original Cherry which we have been testing and improving for years. We have proven it to be one of the best of all red market varieties. This Improved Currant is larger, has better bunches, is a stronger grower, and is better in every respect than the old Cherry. The fruit is large, deep red, and sub-acid. Price, 10c each; 75c per 10; \$5 per 100; \$40 per 1000.

Perfection--In color it is a beautiful bright red, a size larger than the Fay; clusters average longer and the size of berries are maintained to the end of the bunch. It is one of the most productive Currants we have ever known; quality is superior to anything in the market, being of rich, mild, sub-acid flavor and having plenty of pulp with few seeds. Price, 20c each; \$1.50 per 10; \$10 per 100; \$95 per 1000.

Perfection

When you make out your order turn to page 11 and note the premiums we give away. If your order is not large enough to entitle you to the one you desire, ask your neighbor to order with you. Both orders can be packed separately and shipped in one box.

CURRENTS—(Continued)

Red Cross—Large size red Currant, fine quality. One of the most vigorous varieties we have ever tested.

RURAL NEW YORKER SAYS: "Red Cross is the best of all old or new Currants for mid-season."

NEW YORK EXPERIMENT STATION SAYS: "Red Cross is large and productive. The masses of fruit were so dense as to completely hide the bearing canes from view."

JACOB MOORE SAYS: "This is a peculiarity of the Red Cross. I have cut off some of the branches thus heavily laden and sent them to the Rural New Yorker, Country Gentleman, as well as to leading pomologists. These people have said they never saw anything to equal the Red Cross as shown by specimen branches."

E. W. REID SAYS he is remarkably impressed with this variety, especially for its large size and productiveness, it being much superior to Fay's in every respect. I have picked stems of this currant seven inches long with 23 to 26 Currants upon a single stem.

Red Cross Currant—15c each; \$1 per 10; \$6 per 100; \$50 per 1000.

Fay's Prolific—Less acid than Cherry; bunch large, berries medium, bright and sparkling. One of the leading red varieties and a remarkable cropper. Price, 10c each; 75c per 10; \$5 per 100; \$40 per 1000.

CURRENTS—(Continued)

White Grape

White Grape—Very large, yellowish-white, sweet, of very mild acid. Excellent quality; very productive. Best of the white varieties. Price, 10c each; 75c per 10; \$5 per 100.

Wilder—It is one of the strongest growers and very productive. Bunches of berries very large, bright, attractive red color, and hang on bushes longer than any other variety. Price, 10c each; 75c per 10; \$5.00 per 100; \$40 per 1000.

Lee's Prolific (Black)—Considered one of the best black Currants. Fruit large; produces abundantly. Never attacked by insects of any kind. Valuable for making jellies, jam and wine. Price, 10c each; 75c per 10; \$5 per 100.

No. 3. Berry and Currant Collection

3 Red Raspberry	3 Red Currant	1 White Grape Vine
3 Black Raspberry	3 Gooseberry	1 Red Grape Vine
3 Blackberry	All Good Plants	1 Black Grape Vine

Your table supplied with fruit for **\$1.98**

Victoria

Victoria—A late bearing red variety. Berries are large and grow in very long bunches. Victoria is a fine bearer and is grown for commercial purposes in many parts of the country. Price, 10c each; 75c per 10; \$4 per 100; \$35 per 1000.

London Market—Brilliant red; strong grower; less injured by leaf diseases than any other. Fruit good, fine quality, few seeds. Good for market and home use. Price, 10c each; 75c per 10; \$4 per 100; \$35 per 1000.

GRAPE

THE Grape is the most healthful of all fruits, and the most highly esteemed for its many uses. It can be grown by everyone who has a garden, a yard, or a wall. It can be confined to a stake, bound to a trellis, trained over an arbor, or extended until it covers a large tree or building, and still it yields its graceful bunches of luscious fruit. Capable of most extraordinary results under wise management, it is prone also to give the greatest disappointment under bad culture or neglect. Other fruits may be had from plants that know no care; but Grapes are to be had only through attention and forethought.

Soils—Good Grapes are grown on various soils, sand, clay, loam, etc. Soil must be well drained, and there should be a free exposure to the sun and air. Hillsides are good places for Grapes.

Crops—Crop moderately if you would have fine, well ripened fruit. A vine is capable of bringing only a certain amount of fruit to perfection, proportioned to its size and strength; but it usually sets more fruit than it can mature; reduce the crop early in the season to a moderate number of good clusters, and cut off all the small inferior bunches; the remainder will be worth much more than the whole would have been. A very heavy crop is usually a disastrous one.

Pruning—Annual and careful pruning is essential to the production of good Grapes. If the roots are called upon to support too much wood, they cannot bring to maturity a fine crop of fruit. The pruning should be done in November, December, February or March, while the vines are entirely dormant.

Our GRAPE VINES are TWO YEARS OLD and EXTRA STRONG

They will bring you quick and large returns—"WOOD QUALITY"

If Grape Vines are to be sent by mail, add 3c per Plant.

Diamond—Delicate greenish white with a rich yellow tinge when fully ripe. One of the most satisfactory of its class and season. Its quality and beauty makes it popular, while its hardiness, vigor and productiveness make it ideal in the vineyard. Ripens before Moore's Early. 15c each; 25c per 2; \$1.00 per 10; \$6.00 per 100.

Brighton—A large, delicious, sweet red Grape; vine thrifty and a strong grower; flesh sweet, tender and very juicy. Best of all large red Grapes. 15c each; 25c per 2; \$1.00 per 10; \$6.00 per 100.

Delaware—Bunches small and compact; berries small round, thin skinned, light red. Flesh very juicy, with an exceedingly sweet and delicious flavor. Vine nardy and productive. 15c each; 25c per 2; \$1.00 per 10; \$6.00 per 100.

Concord—Decidedly the most popular Grape in America. There are more Concord plants by vineyardists than all other varieties combined. Bunch is large, shouldered, compact; berries large, covered with a rich bloom; skin tender, but sufficiently firm to carry well to distant markets. For general cultivation the most reliable and profitable variety. 10c each; 25c per 3; 75c per 10; \$4.00 per 100; \$32.00 per 1000.

Lindley—Light red; a very handsome Grape; sweet and tender, good quality; keeps well and ships well. Should be grown with Worden or Concord. 15c each; 25c per 2; \$1.00 per 10; \$6.00 per 100.

The Parcel Post rates do not apply to nursery plants. The rate is 1c for every 2 ounces, and 11 pounds is the maximum weight of any package.

GRAPES—(Continued)

Moore's Early

Delaware

Agawam

Moore's Early—Bunch large, berry round; color black, with a heavy blue bloom; quality better than the Concord. Vine exceedingly hardy; has been exposed to a temperature of more than 20 degrees below zero without injury, and is entirely exempt from mildew or disease. Its earliness makes it desirable for an early crop. 15c each; 25c per 2; \$1.00 per 10; \$6.00 per 100.

Agawam—A dark red Grape with fine flavor. Large bunch and berry, rich, sweet and aromatic; strong grower and very productive. 15c each; 25c per 2; \$1.00 per 10; \$6.00 per 100.

Niagara—The vine is a strong grower and very hardy. Bunches very large and uniform and very compact; berries larger than Concord, and skin thin but tough, which insures their shipping qualities; quality good, very little pulp; melting and sweet to center; ripens before Concord. 15c each; 25c per 2; \$1 per 10; \$5 per 100; \$40 per 1000.

Catawba—An old favorite red Grape, grown extensively for commercial purposes in New York State. Berries large and round; flesh fine flavored. Late September. 15c each; 25c per 2; \$1.00 per 10; \$6.00 per 100.

Brown's Seedling (New Black)—An early Grape of exceptionally good quality. The large, black, sweet berries grow in big, thick clusters. It is perfectly hardy. It is a most prolific bearer; ripens evenly and adheres to the stem firmly. It has no equal as an early market variety. 25c each; \$2.00 per 10; \$10.00 per 100.

Worden—Said to be a seedling of the Concord. Bunch large, compact, handsome; berries large—larger than those of the Concord. It ripens a few days earlier and is superior to it in flavor. Destined to become very popular for the vineyard and garden. 15c each; 25c per 2; \$1.00 per 10; \$6.00 per 100.

Brown's Seedling

STRAWBERRY

FIRST of small fruit comes the Strawberry. These should be planted in April or May, in good ground well worked and manured. Set plants fifteen inches apart in rows three feet apart for field culture, and fifteen inches each way for garden culture. Mulch late in the fall and uncover early in the spring. We have growing and offer for sale some of the finest plants that can be grown. Following is a list of some of the most popular varieties we handle.

WE ADVISE ALL OUR FRIENDS TO
PLANT A BED OF MONROE STRAW-
BERRIES.

Strawberries may be sent by
mail. At dozen rates we pre-
pay postage; to prepay
at hundred rate add 25c
to price per hundred.

A Dish of "Monroe" Strawberries—Actual Size

Monroe—This grand Strawberry which we introduced a few years ago has made a record for itself everywhere it has been planted, and it sold on the Rochester market at the top price. One large Strawberry grower told me this past summer that he would plant out only the Monroe next spring for he claims he sold his Monroe for 5c per qt. more than any other kind. Everyone who has seen it on the plant or in the box declares it is a wonder. The deep red color of the berry makes it a very handsome fruit. In size it is extremely large, very uniform in shape and all the berries will grade up extra fancy. The flavor of the "Monroe" surpasses that of any other berry. It is very fine grained, very firm and red to the core. It is very hardy and a strong grower. The blossoms of the "Monroe" are perfect and continue in bloom longer than any other. Price, 50c per 12; \$2 per 100; \$15 per 1000.

Early Beauty—Originated in Iowa; fruit is medium to large, about size and shape of Haverland and fully as productive. Best early variety we ever fruited. Price, 30c per 12; \$1 per 100; \$5.00 per 1000.

✓ **Steven's Late Champion**—Late money-making variety, yielding enormous crops of large, beautiful, good berries that ship well very late in the season after all other varieties have ripened and disappeared. Price, 30c per 12; \$1 per 100; \$5 per 1000.

Senator Dunlap—Season early to medium; popular market sort. It withstands all conditions of weather beyond the average. Very productive; dark red all through. Price, 30c per 12; \$1 per 100; \$5 per 1000.

William Belt—A handsome variety that is giving remarkable satisfaction as a large productive berry for market or home use. Ripens all over without green tips; good quality; carries well to market and brings highest price. Price, 30c per 12; \$1 per 100, \$5 per 1000.

STRAWBERRY—(Continued)

The World's Wonder—Is as productive as the Senator Dunlap, but twice as large. Fruit is uniform in shape; bright red in color and does not turn dark after being picked. It ripens early, is a good shipping berry, and brings an extra fancy price on the market.

Vines are strong, thrifty and rapid in growth. Will produce a large crop on either high or low land. The fruit is so firm and its keeping qualities are so excellent that it does not need to be picked more often than once in three days. Price, 35c per 12; \$1 per 100; \$6 per 1000.

Wilson—The best berry for canning. This is an old well thought of variety that has always given satisfaction. One of the very best berries for flavor and quality. We recommend this variety to you. Price, 30c per 12; \$1 per 100; \$5 per 1000.

RHUBARB— PIEPLANT

Wood's Famous Strawberry Rhubarb—Away ahead of other varieties in color and quality, never tough or stringy. Color a beautiful strawberry red; a quick grower and very hardy. Rhubarb is the most popular and useful of all plants for the garden. It will grow in all soils and locations and takes up very little room. Delicious pies, puddings and sauces are made from the fresh stalks, and when preserved for winter use cannot be surpassed.

Price, 10c each; 25c per 3; 60c per 10; \$4 per 100.

Wood's Strawberry Rhubarb

Strawberry Rhubarb all the year

You can have Early Strawberry Rhubarb throughout the entire year. Cut stalks of young Rhubarb into small pieces. Put these into fruit jars. Fill jar with cold water and seal up tightly. This will keep you in fresh Early Strawberry Rhubarb the entire year.

There is a large number of different ways of serving Early Strawberry Rhubarb—Pies, cakes, sauces, jellies, puddings, etc.

ASPARAGUS

To make a good Asparagus bed, prepare a plot of fine, loamy soil, to which has been added a liberal dressing of good manure. Set the plants 12 inches apart in the row and the rows 20 inches apart. Price, \$1 per 100; \$5 per 1000.

Barr's Mammoth—Robust and vigorous and throws large shoots which remain white above ground as long as they are fit for cutting.

Conover's Colossal—This variety is remarkably tender and fine flavored.

Palmetto—An early and great yielder and very even and regular in growth. It has been tested both North and South and has proved entirely successful in every way.

Barr's Mammoth

Asparagus Culture

A special book that gives the most practical methods of raising, cultivating, harvesting, marketing, forcing and canning Asparagus. This authoritative up-to-date book, prepaid, 50 cents.

Wood's Improved Cuthbert

RED RASPBERRY

If Raspberries are to be sent by mail, add 10c per every 10 plants.

THE Raspberry coming immediately after Strawberries, when there is a scarcity of other fresh fruits, is equally desirable for planting in the garden for home use, and in the field for market. They are easily cultivated. Beds seldom require renewing. Their season of ripening is long. The fruit bears transportation well, and aside from the demand for it for immediate consumption, it brings highly remunerative prices for drying and canning.

Plant in good soil, and manure from time to time freely. The hills should not be less than four feet apart each way, with three to four stalks in a hill. Cut out the old and weak shoots each year, preserving not over six for fruiting. Surplus suckers take strength from the bearing plants. They should be cut away or hoed up frequently.

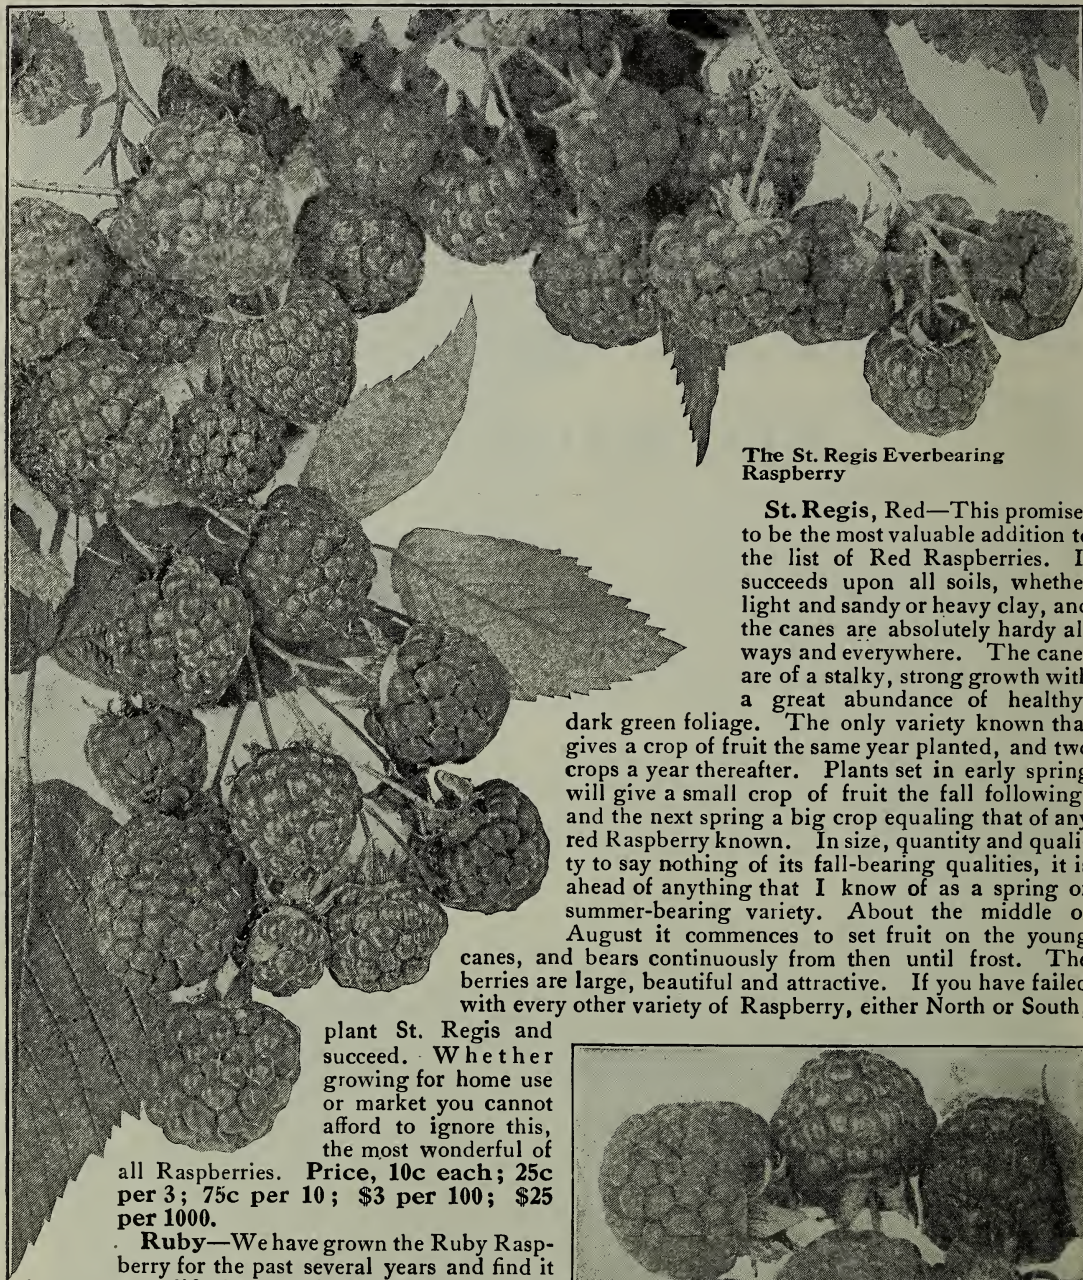

Wood's Improved Cuthbert—A strain of the original Cuthbert which we have been testing and improving for years. It is a strong grower, has healthy foliage, and is very productive if planted on good soil. Cuthbert is one of the old standard, reliable sorts that will give a good crop of large red berries that are firm, have rich flavor, and are of very fine quality; it is more largely grown than any other variety. We recommend it for either home use or field culture. Price, 40c per 10; \$1.50 per 100; \$10 per 1000.

A Corner of a Fifty Acre Patch of Cuthbert Red One Year from Planting

Take advantage of our offer to prepay the freight charges to your station. If your order is not large enough to entitle you to this, perhaps some of your friends will order with you. Each order will be packed separately and shipped in one box—"FREIGHT PREPAID."

RED RASPBERRY—(Continued)

The St. Regis Everbearing Raspberry

St. Regis, Red—This promises to be the most valuable addition to the list of Red Raspberries. It succeeds upon all soils, whether light and sandy or heavy clay, and the canes are absolutely hardy always and everywhere. The canes are of a stalky, strong growth with a great abundance of healthy, dark green foliage. The only variety known that gives a crop of fruit the same year planted, and two crops a year thereafter. Plants set in early spring will give a small crop of fruit the fall following, and the next spring a big crop equaling that of any red Raspberry known. In size, quantity and quality to say nothing of its fall-bearing qualities, it is ahead of anything that I know of as a spring or summer-bearing variety. About the middle of August it commences to set fruit on the young canes, and bears continuously from then until frost. The berries are large, beautiful and attractive. If you have failed with every other variety of Raspberry, either North or South,

plant St. Regis and succeed. Whether growing for home use or market you cannot afford to ignore this, the most wonderful of

all Raspberries. Price, 10c each; 25c per 3; 75c per 10; \$3 per 100; \$25 per 1000.

Ruby—We have grown the Ruby Raspberry for the past several years and find it a prolific bearer. The canes grow large and healthy. The fruit is very large and firm and it ships exceedingly well. We think it is a very valuable early market berry as it starts to ripen before all other varieties, and continues through a long, fruiting season. Price, 50c per 10; \$2 per 100; \$15 per 1000.

Ruby—Earliest of all

No. 3—Berry and Currant Collection

3 Red Raspberry, 3 Black Raspberry, 3 Blackberry, 3 Red Currant,
3 Gooseberry, 1 White Grape Vine, 1 Red Grape Vine,
1 Black Grape Vine

These 18 Plants and Vines are all 2-year-old and first-class in every way, fine roots, good quality **\$1.98**

RED RASPBERRY—(Continued)

Herbert—Hardest Red Raspberry

Herbert—This is known as the (Iron Clad Variety). It is a new red berry which originated in Canada and out-classes all others in hardness. It has splendid qualities. The fruit is large, bright to deep red. It is a very strong grower and very productive. It will pay enormous profits to the grower. It is one of the best market varieties that can be grown. Highly recommended by the Government Experiment Station at Ottawa, Canada. Price, 10c each; 25c per 3; 75c per 10; \$3 per 100; \$20 per 1000.

Marlboro

Marlboro—Large size, light crimson color; good quality and firm. Vigorous and productive. One of the best, well-tested, large early berries for the North. Price, 40c per 10; \$1.50 per 100; \$10 per 1000.

Buy Direct from the Grower

In the Farmer's Bulletin, No. 113, of the United States Dept. of Agriculture, it says: "If the farmer makes his purchase direct from the nurserymen, he will save the expense of the middleman or agent, and is less liable to the mistakes and injuries that occur through repeated handling."

Columbian
Purple-Red Berry

Columbian—Very large, often an inch in diameter; dark red, bordering on purple, adheres firmly to stem and will dry on the bush if not picked; of rich, sprightly flavor, the best for canning or evaporating, and probably the most productive of all raspberries. A most vigorous grower, canes ten to fifteen feet in length and often over an inch in diameter, strong and woody, its roots spreading and penetrating the soil to a great depth, thus enabling it to resist drought. It propagates from the tips and never suckers from the roots. It is very hardy, enduring 28° below zero without injury. Price, 50c per 10; \$2 per 100; \$12 per 1000.

Sodus, Aug. 28—Isaac Vandermill, from less than three acres of land, has sold 11,006 quarts of Columbian Raspberries, receiving for them \$770.42, that being at the rate of \$255.14 an acre of land used. His net profit will be more than he paid for the land.

BLACK RASPBERRY

If Raspberries are to be sent by mail, add 10c per every 10 plants

Plum Farmer

Gregg—Plants vigorous, hardy and productive ; fruit above medium to very large. Price, 40c per 10 ; \$2 per 100 ; \$12 per 1000.

Black Diamond—One of the best for home and market use. For drying and evaporating it excels all others. The fruit is large and handsome, and on account of its good size, good keeping qualities and its productiveness, is one of the most profitable to grow. Very sweet and excellent. Price, 40c per 10 ; \$2 per 100 ; \$12 per 1000.

Black Diamond

Plum Farmer—This is a very large and productive black Raspberry and has been thoroughly tested in Western New York where it is a great favorite for market and home use. The fruit is very large, often measuring an inch in diameter. It is a fine picker and brings the highest prices on the market. Wherever we have sold Plum Farmer it has given good satisfaction and has been a money-maker for its grower. We recommend this variety as being the best of the black Raspberries. Price, 40c per 10 ; \$2 per 100 ; \$12 per 1000.

First Prize State Fair

Syracuse, N. Y., September, 1912
awarded to

*The Woodlawn Nurseries
Rochester, N. Y.*

Growers of "Wood Quality" Trees
and Plants

Kansas

Kansas—The fruit is nearly as large as the Gregg ; handsome, firm and of fine quality. For a good second-early Raspberry there is nothing better than this. It possesses all the valuable attributes of a profitable market sort, and its large size and attractive appearance insure ready sales at good prices. Price, 40c per 10 ; \$2 per 100 ; \$12 per 1000.

BLACKBERRIES

A NY moderately rich soil will answer for their cultivation, but to avoid too strong a growth and stragling habit, pinch the ends of the shoots during the season. This will give you more fruit and a better shaped bush. *If Blackberries are to be sent by mail, add 10c per every 10 plants.*

Cluster
of
Eldorado
Black-
berries

Eldorado—One of the finest Blackberries in cultivation. The berries are of good size, glossy black, very sweet and tender, and retain their lustre a long time after being picked. A reliable, standard variety. Price, 50c per 10; \$2 per 100; \$15 per 1000.

Snyder—The Reliable

Snyder—The "Old Faithful" of the Blackberries. Always bears and is the favorite among the old kinds. It is a very hardy, upright grower, canes large, and is productive. Price, 50c per 10; \$2 per 100; \$15 per 1000.

We have no agents selling our stock, therefore we save you agents commissions. "Wood Quality" stock is the best.

Branch of Blowers

Blower—"The Giant of all Blackberries." It is an upright, mammoth grower, is very hardy and enormously productive. A single plant produced over 2600 berries and from $\frac{3}{4}$ of an acre of land 112 bushels of fruit were picked which sold at \$4.80 per bushel or at a rate of \$716.80 per acre. The Blower commences to ripen about the middle of July and bears about two months. Price, 10c each; 25c per 4; 60c per 10; \$3.50 per 100; \$25 per 1000.

ORNAMENTAL TREES

BEAUTIFY YOUR HOME GROUNDS

NOTHING will add more value to your property than ornamental trees, plants, shrubs and vines. If you want to sell your home or estate you will find that these improvements will add immensely to its value and beauty. We offer a large variety of ornamental trees, plants and shrubs to choose from. They are all healthy and vigorous growers.

Catalpa Bungeii each side of walk

Catalpa Bungeii (Umbrella Catalpa)—Grafted on stems 6 to 8 ft. high, it makes an umbrella shaped top without pruning; perfectly hardy, and flourishes in almost all soils and climates; leaves large, glossy, heart-shaped, deep green; always making a symmetrical head. One of the most unique trees; desirable for lawn, park and cemetery planting. Two-year trees, extra large, \$1.00 each.

Catalpa, Speciosa

Catalpa Speciosa—A variety which originated in the west, but which has become very popular throughout the country on account of its hardy nature. The trunk is straight and smooth. It is a very ornamental and valuable tree for streets and parks. 7 to 8 ft., 50c; 8 to 10 ft., 75c.

Beech, Purple-Leaved—Makes an elegant, medium size tree for the lawn; the foliage in the spring is a deep purple, later changing to crimson. Highly ornamental and desirable. 5 to 6 ft., 75c each.

ORNAMENTAL TREES—(Continued)

Cut-Leaf Birch

Birch, Cut-Leaf Weeping—It's tall, slender, yet vigorous growth, graceful, drooping habit, silvery-white bark and delicately cut foliage present a combination of attractive characteristic rarely met with in a single tree. 6 to 7 ft., 75c each.

American Chestnut

Chestnut, American—This tree, besides being valuable for the nuts it produces, is very ornamental as a shade tree. 50c each; \$5 per dozen.

American Elm Trees in Front of Our Rochester Packing Grounds

Elm, American—A native tree of large size, with open, spreading head, and graceful drooping branches. Very popular in nearly all sections, and valuable for street planting. Succeeds admirably everywhere. 8 to 10 ft., 75c; 10 to 12 ft., \$1.

Magnolia, Acuminata or Cucumber Mag.—A magnificent tree, growing very rapidly and often attaining a height of 60 to 90 ft., producing in June yellow flowers tinted with bluish purple; fruit when green resembles a cucumber, hence its name. Very handsome and desirable. 7 to 8 ft., 75c each.

Magnolia

Magnolia, Soulangeana—Chinese variety, dwarf grower, bears showy white and purple flowers, cup-shaped, and three to five inches in diameter. Foliage dark and glossy. \$2 each.

Magnolia, Speciosa—Flowers smaller, lighter in color than Soulangeana and remain on the tree longer than any other variety. \$2 each.

ORNAMENTAL TREES—(Continued)

Silver or Soft Maple

Maple, Silver Leaf or Soft Maple—A hardy, rapid-growing native tree of large size. Valuable for producing a quick shade. Excellent for street planting.

	Price—Each	Ten	Hundred
8 to 10 ft.,	65c	\$6.00	\$55
10 to 12 ft.,	85c	8.00	75

Maple, Ash-Leaved or Box Elder—A fine rapid growing variety, with handsome, light green foliage and spreading head; very hardy, desirable for street planting where other varieties do not thrive.

	Price—Each	Ten	Hundred
7 to 8 ft.,	50c	\$4.50	\$40
8 to 10 ft.,	75c	7.00	60

Norway Maple

Maple, Norway—A native of Europe. Its large, compact habit, broad, deep green, shining foliage and its vigorous growth render it one of the most desirable species for streets, parks and lawns.

	Price—Each	Ten	Hundred
8 to 10 ft.,	\$.75	\$7.00	\$60
10 to 12 ft.,	1.00	9.00	80
Extra large	1.50	12.00	100

Maple, Weir's Cut Leaf—This is one of the most remarkable and beautiful trees with cut or dissected foliage yet offered. Its growth is rapid, shoots slender and drooping, giving it a habit almost as graceful as the cut-leaved Birch. One of the most valuable and handsome of the ornamental trees. Price, 8 to 10 ft., 75c; 10 for \$7.00; 100 for \$65.

Sugar Maple

Maple, Sugar or Rock—A native tree valuable for its production of sugar and wood. Very stately in form, rapid grower and has fine foliage. Valuable ornamental variety. Price, 8 to 10 ft., \$1.00; 10 for \$9.00; 100 for \$80.

Maple, Japan Blood-Leaved

Maple, Japan Blood-Leaved—There is not a dwarf tree in cultivation which can compare with the Japanese Maple for grace and beauty. They grow best in partially shaded situations and in rich, well-drained soil. Price, 2 to 3 ft. high, \$1.25.

ORNAMENTAL TREES—(Continued)

Lombardy Poplar

Poplar, Lombardy—Well known for its erect rapid growth and commanding form. Very desirable on large grounds or along roads, to break the average heights and forms of other trees.

Price, 5 to 6 ft., 25c each; \$2.00 per 10; \$18 per 100
 " 6 to 8 ft., 30c " ; 2.50 " 10; 22 " 100
 " 8 to 10 ft., 40c " ; 3.50 " 10; 30 " 100

American Linden or Basswood

Linden, American—A rapid growing, open head or spreading tree, with large leaves and fragrant flowers. Very desirable on account of its fine luxuriant foliage. 8 to 10 ft. trees, 75c ea.

Walnut, Japan—Perfectly hardy, rapid grower, handsome form, large leaves; bears young and abundantly; one of the finest ornamental trees. Nuts produced in clusters; resembles Butternuts in shape and quality; smaller, with smooth and thinner shell. 50c each.

Walnut, Black—The well-known native species; hardy, prolific and valuable; timber in point of durability is difficult to excel. 50c each.

Walnut, English (Maderia Nut)—This rich and fine flavored nut is moderately hardy, and makes a vigorous growth. 50c each.

Willow, Babylonica—Our common well known weeping variety; forms a large round-headed, graceful tree; requires plenty of room, and where space can be spared, is quite desirable. 50c each.

Carolina Poplar

Poplar, Carolina—A remarkably rapid, luxuriant grower. Very large leaves, very glossy, deep green. Valuable as a street or shade tree where shade is required quickly. Useful for planting as a screen to hide unsightly buildings or as a wind-break for an orchard or garden plot.

	Price—Each	Ten	Hundred
7 to 8 ft.,	25c	\$2.00	\$15
8 to 10 ft.,	30c	2.50	20
10 to 12 ft.,	40c	3.50	25

We have some extra fine trees which will run 12 to 14 ft. in height, all beautiful well-grown specimens for special planting. 75c each; 10 for \$7.

Butternut—Valued for its tropical appearance and beautiful wood, as well as for its nuts. Produces large, handsome, elongated nuts with rich, sweet, oily kernel; very nutritious. The tree grows rapidly and yields large crops in a few years. There are large profits in Butternut growing. A small outlay will bring large returns as soon as the trees begin to bear. 6 to 8 ft. trees, 50c each.

ORNAMENTAL TREES—(Continued)

Bechtel's Double-Flowered Crab

Bechtel's Double Flowered Crab—Tree is of medium size, and a strong, hardy grower. Flowers are double and very fragrant. They resemble delicate pink roses. When in bloom it looks like a mammoth rose tree. Price, 75c each; \$6.50 per 10.

Laburnum or Golden Chain—A native of Europe with smooth shining foliage. Bears long pendant racemes of golden flowers in June. Very showy and beautiful. 5 to 6 ft., 50c each.

Purple-Leaved Plum (Prunus Pissardi)

Purple-Leaved Plum (Prunus Pissardi)—The finest purple-leaved small tree of recent introduction. The young branches are a very dark purple; leaves when young are lustrous crimson, changing to a dark purple, and retain this beautiful tint till they drop late in autumn; no other purple-leaved tree or shrub retains its color like this. Flowers small, white, single, covering the tree. 4 to 5 ft., 50c each.

Mountain Ash—A favorite; erect growing tree of medium size, producing white flowers early in the spring, followed by clusters of bright scarlet berries which remain on the tree through the winter months. Price of trees 8 to 10 ft. high, 50c each.

Chestnut, Spanish—This nut tree is very valuable for the lawn. 50c each; \$5 per doz.

Horse Chestnut—The well-known variety. Has magnificent spikes of white flowers. Fine for street planting. 8 to 10 ft., 75c each.

Tea's Weeping Mulberry

Mulberry, Tea's Weeping—One of the finest, most graceful and satisfactory of weeping trees. Umbrella shaped head, with slender willowy branches drooping to the ground. It has beautiful glossy foliage, it is perfectly hardy. \$1.00 each.

Mulberry, Downing—This tree is not alone valuable for the large refreshing berries it bears, but is very handsome as a lawn or street tree. This should be in every yard or garden. 5 to 7 ft., 50c each; \$4.50 per 10.

Mulberry, Russian—Very hardy, vigorous grower; valuable for feeding silk worms, etc. Fruit of small size. 7 to 8 ft., 50c each; \$4.50 per 10.

Thorn, Paul's New Double Flowering—This tree deserves to be classed among the most beautiful of all ornamentals. It is a dense, low grower and occupies but little space; well adapted to beautify small grounds. Flowers are bright carmine red color and bloom in May and June. Price, 3 to 4 ft., 50c each.

Tulip Tree, or White Wood—One of our largest native trees, with large glossy leaves shaped like a violin, and beautiful tulip like flowers. Very desirable for planting on lawns, or where trees are desirable for rapid growth. When fully grown 50 feet high. 7 to 8 ft., 65c; 8 to 10 ft., 75c.

PLANTS AND BULBS

Pæonies

Chinese Pæonies—Fine hardy plants, rivalling the rose in perfection of bloom and coloring and requiring little extra care, as they thrive and do well in any soil. Our Pæonies are all choice 2-year-old plants. They will bloom the first year if planted out early. We have the following colors: **Blush, Crimson, Purple, Pink, Red, Variegated, White, Yellow**—25c each; \$2 per 10.

Pæonie, Fringe-Leaved—Beautiful foliage in thread-like filaments; flowers very double, of dark satiny crimson color. Rare and exquisitely lovely. 35c each; \$3 per 10. If Pæonies are to be sent by mail, add 5c per plant.

Anchusa—Best of all plants for borders of walks. Flowers are pure blue; plant is very hardy and a strong grower. Height of plant about 3½ ft., very bushy and covered with pure blue flowers. One of the most beautiful plants grown. 35c each; \$3 per 10. If sent by mail, add 5c per plant.

Japan Iris—Flowers of immense size, rich colorings and markings. They delight in a rich deep soil with plenty of moisture. 20c each; \$1.50 per 10. If sent by mail, add 5c per plant.

Yucca (Spanish Bayonet)—A very hardy and strong growing plant. Endures the severest winters; blossoms year after year. Flowers resemble the white lily. A very long bloomer; stalks sometimes six feet high, making a very showy flower. Extra strong plants. 25c each; \$2 per 10. If sent by mail, add 5c per plant.

Phlox

Phlox—No class of hardy plants is more desirable than the Perennial Phloxes. We offer a select list of strong, field grown roots in the following colors: **Purple, Lilac, White, Pink**. 15c each; \$1.25 per 10. If Phlox are to be sent by mail, add 5c per plant.

Lily of the Valley

Lily of the Valley—Will thrive in any kind of soil and throw up its beautiful, modest, fragrant white bells. 10c each; 50c per 10; \$3 per 100. If sent by mail, add 1c per plant.

WOODLAWN NURSERIES

THREE COMPLETE PLANTING PLANS FOR CITY LOTS

If you tell us what you want to expend on your grounds and send us a rough drawing of your place, we can make you a blue print map for \$2.00 or \$3.00, and tell you what to plant and how to arrange it.

Lot 30 x 120 ft. Can be made attractive at a low expense.

1 Norway Maple	-	\$1.00	4 One Hall's Japan Honeysuckle	\$.25	7 One Purple Lilac	-	\$.25
2 Seven Barberry Thunbergii	-	1.75	5 Four Spirea VanHouttei	-

A simple yet very effective planting—28 Shrubs were set out at a cost of only \$7.00. A few Shrubs planted out in your yard will increase the valuation of your property several hundred dollars.

HARDY ORNAMENTAL SHRUBS

OUR Shrubs are all strong, well-rooted, transplanted stock from open ground. Once carefully planted in suitable positions they increase in size and beauty from year to year, and require but little further care. The time of bloom of the different sorts extends over nearly the whole season, though the greatest show is to be expected in spring and early summer.

Barberry, Thunbergii

Barberry, Thunbergii—A shrub of marked excellence on account of its bright green foliage, which changes to brilliant colors in the fall, and its bright scarlet berries, which are very conspicuous throughout the winter. The habit is dwarf and regularly spreading. Grows well in the shade and extensively used in landscape work. Is very hardy, has never been known to winter-kill. 25c each.

Althea, or Rose of Sharon

Althea (Rose of Sharon)—Showy flowering shrub, strong, erect growing, bell-shaped flowers of striking colors; Sept. when most other shrubs are out of bloom. We have the following colors: Pink, Purple, Red, White. 25c each.

Tree Althea—50c each.

SHRUBS—(Continued)

Almond (Large Double Flowering)—One of the most beautiful early flowering shrubs, bearing lovely rosettes all over the bush. Two varieties, pink and dark red. 35c each.

Azalea, Mollis—This little plant is literally covered with bloom in April or May. Flowers are large and of a variety of colors in shades of red, yellow and orange. 50c each; \$4 per 10.

Azalea, Ghent—Handsome and distinct shrub from Japan; unequalled for brilliancy and variety of color, while flowers are not so large as in the Mollis, the color is more delicate. 75c each; \$6.50 per 10.

Barberry, Purple-Leaved—Foliage a beautiful deep purple all the year; a splendid specimen shrub and almost indispensable in contrastive groupings. 25c each; 5 for \$1.

Calycanthus, or Sweet-Scented Shrub—Very desirable on account of the peculiarity and very pleasing fragrance of its wood; its foliage is rich; flowers of a rare chocolate color, with an agreeable odor. Blossoms in June and intervals through the summer; very desirable. 25c each.

Deutzia, Gracilis

Deutzia, Gracilis—A dwarf variety, covered with white flowers in June. Well adapted to planting in cemetery lots or small door yards; fine for pot culture. Flowers freely in low temperature during the winter. First to flower. 25c each.

Deutzia, Candida—Pure white flowers, very double. The Deutzia is the finest of all flowering shrubs. 25c each.

Deutzia, Crenata (Double Pink Deutzia)—A tall growing variety having very double pink flowers. 25c each.

Deutzia, Lemoinei—Pure white flowers, borne on stout branches of upright growth. Dwarf habit, free flowering. 25c each.

Cornus Elegantiissima (Variegated Leaf)—One of the finest shrubs, with beautifully variegated foliage. The leaves are broadly margined with white, while some are entirely white. 35c each; \$1 per 3.

Deutzia, Pride of Rochester

Deutzia, Pride of Rochester—Very large double white flowers. It excels in size of flower, profuse bloom and vigorous growth; nearly a week earlier than Deutzia Crenata. 25c each.

Clethra Alnifolia, or Sweet Pepper Bush—Very hardy; blooms every season without fail; cold never harms it; flowers pure white, in spikes three to six inches long. A bed of Clethras will perfume the air for a long distance around; a single sprig will fill a room with its delightful fragrance. It is a neat, upright-growing shrub, valued for its beauty and sweetness; never fails to bloom after a hard winter. 30c each.

Cornus Muscula

Cornus Muscula (Cornelian Cherry)—A large shrub that bears bright, yellow flowers early in spring and bright red berries in autumn. 30c ea.

SHRUBS—(Continued)

Hydrangea F. G.

Hydrangea Paniculata Grandiflora—Hardy; the flowers are immense, greenish white when first open, changing to pure white and turning pink with age. Commences to flower in July and remains until November. 25c each.

Lilac, White

LILACS—Best beloved of all the old time garden shrubs; whose flowers never fail to charm with their delicate beauty or refresh the soul with their tender fragrance.

Lilac, Red—Purple-red flowers, standard variety. 25c each.

Lilac, Purple—Bluish-purple flowers, standard variety; always good. 25c each.

Lilac, White—Cream colored flowers; very fine. 25c each.

Lilac, Lemoine—A choice variety bearing large clusters of double white flowers. 50c ea.

Hydrangea, P. G. Tree Form—Same as bush, but grown in tree form with single stem. Very desirable. 50c each.

Golden Glow

Golden Glow or Summer Chrysanthemum—Large showy plant, attaining in good soil a height of 6 to 8 feet the same season planted. Flowers $3\frac{1}{2}$ inches in diameter, double, well formed and of deep golden yellow color, resembling yellow Chrysanthemums, and borne on long stems which render them suitable for cutting. 10c ea.; 25c per 3; 60c per 10.

Forsythia, or Golden Bell—This is a pretty shrub of medium size. Native of China and Japan. The flowers are drooping, yellow, and appear very early in the spring, before the leaves. 25c each.

Hydrangea, Arborescens

Hydrangea, Arborescens Grandiflora Alba (Hills of Snow)—This hardy American shrub is the very finest edition to this class of plants found in many a year. The blooms are of the very largest size, of pure snow-white color, and the foliage is finely finished, lacking entirely the coarseness found in *Hydrangea Paniculata Grandiflora*. 35c each; \$1 per 3.

SHRUBS—(Continued)

Weigela Candida

Weigela Candida—This is the very best of all the white flowering Weigelas. A strong upright, erect grower; flowers pure white and produced in great profusion in June and continues to bloom through the entire summer. 25c each.

Weigela, Rosea

Weigela, Rosea—Hardy, beautiful shrub bearing in May a profusion of rose-colored flowers. 25c ea.

Weigela, Eva Rathke

Weigela, Eva Rathke—The most distinct and one of the most attractive varieties; flowers deep carmine red. 25c each.

Weigela, Variegated—Fine, variegated foliage and lasts the entire season; contrasts finely with its rose colored flowers. 25c each.

Syringa, Golden

Syringa, Golden—This is a very pretty medium-size plant, with golden-yellow foliage. It keeps its color the entire season; valuable for striking contrasts with purple-leaved shrubs. 35c each.

Syringa, Common—Of vigorous habit; very hardy, with large handsome foliage and beautiful white flowers. 25c each.

Japan Snowball

Snowball, Japan (*Viburnum Plicatum*)—An erect, compact shrub, blooming in June, the plants being completely covered with large balls of flowers as white as snow; foliage is a dark green. 35c ea.

Snowball, Common—A large sized shrub with globular clusters of pure white, sterile flowers the latter part of May. We have a fine lot of strong plants. 25c each.

SHRUBS—(Continued)

Spirea, Anthony Waterer

Spirea, Anthony Waterer—New dwarf Spirea; dark crimson flowers; one of the finest. 35c each.

Purple Fringe or Smoke Tree

Purple Fringe (Smoke Tree)—A beautiful distinct shrub, with large bunches of feathery flowers which give the tree the appearance of being covered with a cloud of smoke. 35c each.

Spirea, Aurea (Golden)—Foliage green, bordered with a rich golden yellow. In June the branches are covered with a double white flower. 25c each.

Spirea, Billardi—Rose colored flowers in spikes, blooms nearly all summer. 25c each.

Beautify Your Home by planting out a few Ornamental Trees, Shrubs and Vines. These will add immensely to its value.

Spirea, Prunifolia

Spirea, Prunifolia (Bridal Wreath)—Double daisy-like, pure white flowers. 35c each.

Spirea, Van Houttei

Spirea, Van Houttei—Finest of the Spireas, giving a complete mass of drooping white bloom. 25c each ; 5 for \$1.

Golden Elder

Golden Leaved Elder—The best of all the colored shrubs. A plant of this bush in a bed, or a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold. 25c each.

Ornamental Vines

If sent by mail, add 5c per Vine

Ampelopsis Veitchii

Ampelopsis Veitchii (Japan Ivy)—For covering buildings of brick and stone; clings tightly to the smoothest surface. Bright green leaves, changing to brilliant colors in the fall. 25c each.

Wistaria, Purple

Wistaria, Chinese Purple—One must see this plant in bloom to appreciate its magnificence. Perfectly hardy; it flowers in spring in long drooping racemes; very beautiful. 25c each.

Birthwort—Dutchman's Pipe

Birthwort or Dutchman's Pipe—A rapid growing vine, with magnificent foliage and curious pipe-shaped brown flowers. 40c each.

Ivy, American or Virginia Creeper—A native climber of vigorous growth; a fine green in summer, changing to rich crimson in fall. It affords shade quickly; desirable for covering walls, verandas or trunks of trees. 25c ea.

Chinese Matrimony Vine—Vigorous and hardy climber; flowers bright purple, succeeded by scarlet berries nearly one inch long. Excellent for trellises. 25c each.

Hall's Japan Honeysuckle

Honeysuckle (Hall's Japan)—A strong, vigorous grower, almost evergreen, with pure white flowers, turning to yellow; very fragrant; covered with flowers from July to December. 25c each.

VINES—(Continued)

Clematis Paniculata

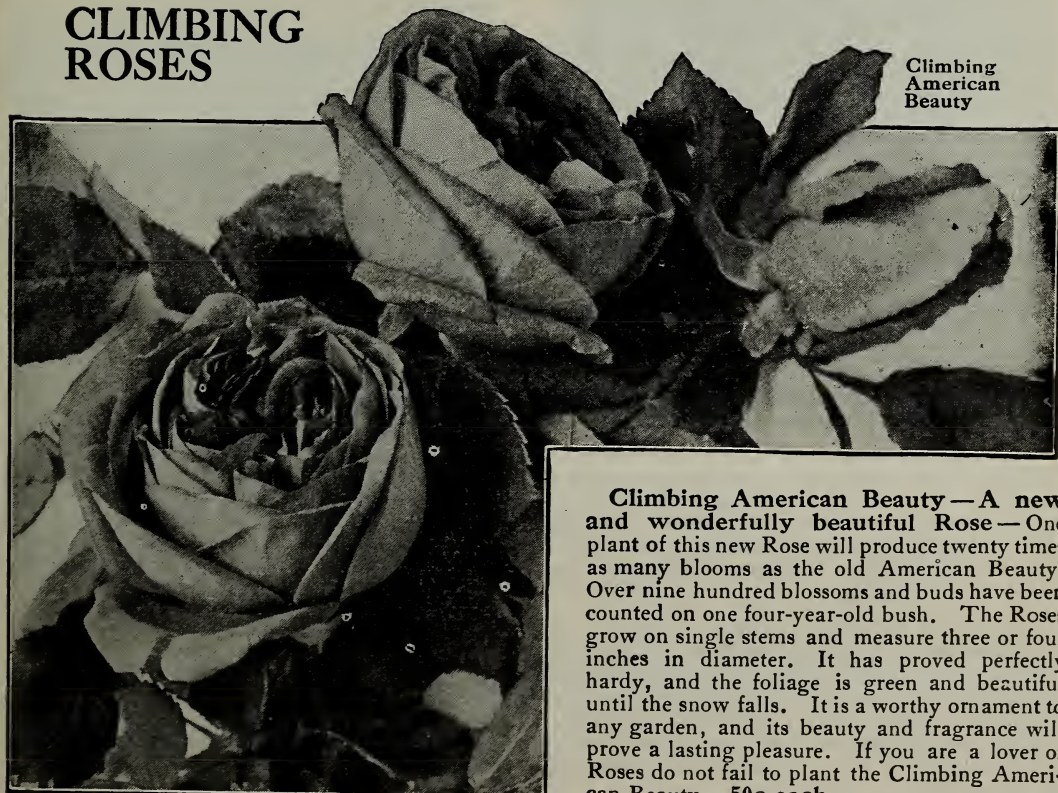

Clematis Paniculata—Single, white. Of extremely rapid growth, with shining green foliage, and a profusion of flowers which are small but borne in large panicles; very popular. 25c each.

Clematis, Mme. Ed. Andre—Flowers medium size, dark red; velvety; very free flowering. 35c each; 3 for \$1.

Clematis, Henryii—Single; the finest white Clematis; very large, fine flowers; grows rapidly; blooms freely during summer and autumn. 35c each; 3 for \$1.

Clematis, Jackmanni—Single. Very large; deep purple; forms a perfect mass of the richest bloom. 35c each; 3 for \$1.

CLIMBING ROSES

Climbing American Beauty

Climbing American Beauty—A new and wonderfully beautiful Rose—One plant of this new Rose will produce twenty times as many blooms as the old American Beauty. Over nine hundred blossoms and buds have been counted on one four-year-old bush. The Roses grow on single stems and measure three or four inches in diameter. It has proved perfectly hardy, and the foliage is green and beautiful until the snow falls. It is a worthy ornament to any garden, and its beauty and fragrance will prove a lasting pleasure. If you are a lover of Roses do not fail to plant the Climbing American Beauty. 50c each.

CLIMBING ROSES—(Continued)

White Rambler—In growth, etc., similar to Crimson Rambler, only the color is pure white. Not as hardy or as free grower. 25c each.

Pink Rambler—Resembles Crimson Rambler in every respect but color, which is clear pink. One of the most attractive. The mature buds often change to creamy white. 25c each.

Yellow Rambler—Light canary shade; clusters smaller, individual flowers larger than Crimson. 25c each.

Baby Rambler

Baby Rambler—A dwarf (bush not climbing). Everblooming; with bloom continuously through the summer. Has the same bright crimson color as the climbing Crimson Rambler and blooms in clusters of 20 to 40 flowers at one time. 25c each.

Dorothy Perkins—This Rose is of the same strong habit of growth as the Crimson Rambler; sweetly scented and of a beautiful shell-pink color. Absolutely hardy. 25c each.

Tree Rose

Crimson Rambler

Crimson Rambler—This is a very popular climber. It is a vigorous and rapid grower, often growing 8 to 15 feet the first season. A charming variety for covering trellises or buildings. If grown on a wire fence as a hedge it will attract immediate attention. It produces clusters of handsome crimson roses. 25c each.

The **Tree Roses** are grafted on hardy rose canes four to five feet high, are tree shaped, and when in full bloom are objects of beauty, making handsome plants for the lawn. They need winter protection. We can supply **White, Red, Pink, Yellow** and **Crimson** colors, very fine, strong trees that will bloom the first year. 75c each; \$6.50 per 10.

Hardy ^{Two}Year Field Grown Roses For Permanent Outdoor Planting

If to be sent by mail, add 5c per Plant.

Roses do best in a warm, sunny spot and must be shielded from strong winds. They thrive in mostly any soil that is well drained. Our list comprises reliable, hardy varieties.

Mrs. R. G. S. Crawford

Mrs. R. G. S. Crawford—A variety introduced from Ireland. Color, deep rosy pink. Flowers practically all summer long; very vigorous. Awarded gold medal at National Rose Show of England. 25c each.

Kaiserin Augusta Victoria

Kaiserin Augusta Victoria—A Rose that blooms continually from spring until fall. A very strong grower that is very valuable for planting single specimens in the open ground. Does not need protection. Buds are pointed, flowers large, full and double, of an elegant snowy white color. Price, 35c each.

LaFrance—Hybrid Tea Rose. Delicate silvery rose color, changing to silvery pink; very large and full, globular form. Sweetest Rose and most constant bloomer. 25c each.

Moss Rose, Perpetual Pink—A mossed Rose of a delicate shell pink color. A long bloomer. Leaves clear green, very handsome. 25c each.

Prince Camille de Rohan—One of the darkest colored Roses; very dark velvety crimson, changing to intense maroon. A very prolific bloomer, and flowers are of excellent form and size. 25c each.

Persian Yellow—Bright yellow, nearly full. Hardy and vigorous. 25c each.

Earl of Dufferin

Earl of Dufferin—One of the finest Roses of recent years. Rich, brilliant, velvety crimson, shaded with dark maroon; large, full, finely formed; delightful fragrance. A vigorous grower. One of the finest dark Roses. 25c each.

Paul Neyron—One of the finest hardy Roses ever grown. It blooms unceasingly from June to November, on uniformly long, stiff, thornless stems, with immense cup-shaped flowers 4 to 6 inches across. Color a bright ruddy pink. 25c each.

Margaret Dickson—A beautiful, fragrant, white Rose with a pale flesh pink center; petals very large, shell shaped and of great substance; foliage very large, dark green. 25c each.

ROSES—(Continued)

American Beauty

American Beauty—Probably the widest known and most prized cut flower among all American Roses, and equally popular for bedding. Deep pink approaching crimson, of exquisite form and fragrance, and large size. 35c each.

Soleil d'Or or Golden Sun—Rich golden yellow shaded with deep red, very beautiful. A robust and vigorous grower, free bloomer. 35c ea.

Gruss an Teplitz—Scarlet, shading to velvety crimson, very fragrant, a full grower and most profuse bearer. One of the choicest. 25c each.

Frau Karl or Snow Queen

Frau Karl Druschki or Snow Queen—An exquisite new pure white Rose, sent out in 1900. Very large and fragrant. The most perfect of all white Roses. 25c each.

General Jacqueminot

General Jacqueminot — Brilliant crimson. Large and extremely effective; fragrant and of excellent hardy habit. 25c each.

**Rhododendron
or Rosebay**

RHODODENDRON (Rosebay) — Through its blooming season in May and June, no shrub in Nature's garden, the world over, can compare with this. In winter the great leathery leaves of the Rhododendrons form rich banks of green. Rhododendrons are most effective and most easily cared for when planted in large beds or groups, so that their flowers may be displayed in rich masses. They will grow in any good soil, but are finest in a somewhat sheltered situation, where the soil is deep, well drained and mulched with leaves. The plants we offer are strong and bushy, well set with flower buds, and will flower nicely first year. Colors pink, purple, red, white. \$1.00 each.

Barberry Thunbergii Hedge

Barberry Thunbergii—Dwarf growing shrub; foliage, rich bright green which takes on a brilliant red color in autumn. Red berries also appear at this time. 18 to 24 in., 25c each; \$2 per 10; \$12 per 100. 12 to 18 in., 20c each; \$1.50 per 10; \$10 per 100.

California Privet Hedge

California Privet—A rapid and vigorous grower everywhere. It has handsome glossy foliage and is the best shrub for hedge planting. 2 to 3 ft., 15c each; \$1 per 10; \$4 per 100. 18 to 24 in., 10c each; 75c per 10; \$3 per 100.

EVERGREENS

Colorado Blue Spruce

Koster's Colorado Blue Spruce—The most beautiful variety of all evergreens; fine, compact habit; rich blue foliage. In great demand throughout the Eastern States where fine specimens are established, proving it the best of all evergreen trees for the lawn. Selected specimens, 2 ft., \$2 each; \$18.50 per 10.

Norway Spruce—Best Evergreen for all purposes. It is extremely hardy and will grow anywhere. Pyramidal in form and of rapid growth. Makes a beautiful ornament for the lawn when planted singly and when set out as a hedge or wind break cannot be beaten. Norway Spruce will grow singly or in a hedge form as high as 25 feet, forming a perfect shield for the orchard or home.
